

Faculty of Engineering & Technology
Expert Lecture on “GPS and its use in Land Surveying”

Faculty of Engineering & technology had arranged Expert Lecture on 27 March 2024. The Title of lecture was “GPS and its use in Land Surveying”. Following are the outcomes of the expert lecture:

1. Enhanced understanding of GPS and its use in Land Surveying: The lecture likely covered the principles, components, and operations Involved in Surveying
2. Knowledge of GPS equipment: Participants likely learned about the various parts of the digital global positioning system device and its use on the field.
3. Awareness of emerging trends and technologies: GPS in surveying is a dynamic field that continually evolves the latest trends and updated coordinating system. The lecture may have discussed emerging trends and technologies shaping the future.
