

GURU KASHI UNIVERSITY

Bachelor of Pharmacy

Session: 2022-23

Department of Pharmacy

PROGRAMME LEARNING OUTCOMES

- 1 To acquire comprehensive knowledge and basic principles of Pharmaceutical agents and devices along with other associated sciences.
- 2 To develop an ability to identify, formulate and solve complex problems of Pharmaceutical Industry, Community & Hospital Pharmacy.
- 3 To design solutions for complex pharmacy problems that meet the specified needs with appropriate concern for the public health and safety and the cultural and environmental considerations.
- 4 To use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.
- 5 To apply appropriate methods, procedures, resources and modern pharmacy-related computing tools.
- 6 To apply contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.
- 7 To understand the impact of the professional pharmacy solutions in community and environmental contexts, and demonstrate the knowledge and need for sustainable development.
- 8 To possess personal & universal values and apply ethical principles in professional and social contexts.
- 9 To understand the responsibility as an individual and as a member, or leader in professional team or multidisciplinary settings.
- 10 To communicate effectively in the professional settings and with society at large.
- 11 To apply and demonstrate their professional skills and comprehensive knowledge to manage projects, to carry out research in the core and applied areas of Pharmaceutical sciences.
- 12 To recognize the need for self-assessment and effectively use the feedback from others to identify learning needs to compete globally.

Programme Structure

Semester- I						
Course Code	Course Title	Type of Course				Credit
			L	T	P	
BP101T	Human Anatomy and Physiology I–Theory	Core Course	3	1	0	4
BP102T	Pharmaceutical Analysis I – Theory	Core Course	3	1	0	4
BP103T	Pharmaceutics I –Theory	Core Course	3	1	0	4
BP104T	Pharmaceutical Inorganic Chemistry - Theory	Core Course	3	1	0	4
BP105T	Communication skills– Theory *	Ability Enhancement	2	0	0	2
BP106RBT	Remedial Biology	Deficient Course	2	0	0	2
BP106RMT	Remedial Mathematics – Theory*					
BP107P	Human Anatomy and Physiology I– Practical	Technical Enhancement	0	0	4	2
BP108P	Pharmaceutical Analysis I – Practical	Technical Enhancement	0	0	4	2
BP109P	Pharmaceutics I – Practical	Technical Enhancement	0	0	4	2
BP110P	Pharmaceutical Inorganic Chemistry- Practical	Technical Enhancement	0	0	4	2
BP111P	Communication skills– Practical*	Ability Enhancement	0	0	2	1
BP112RBP	Remedial Biology – Practical*	Ability Enhancement	0	0	2	1
Total			32/34[#]/36[#]			27/29[#]/30[#]

[#]Applicable ONLY for the students who have studied Mathematics / Physics / Chemistry at HSC and appearing for Remedial Biology (RB) course.

^{\$}Applicable ONLY for the students who have studied Physics / Chemistry / Botany / Zoology at HSC and appearing for Remedial Mathematics (RM) course.

Semester- II						
Course Code	Course Title	Type of Course				Credit

Total Number of Course	76
Number of Theory Course	49
Number of Practical Course	27
Total Number of Credits	212

Sessional Exams

Two Sessional exams shall be conducted for each theory / practical course as per the schedule fixed by the college(s). The scheme of question paper for theory and practical Sessional examinations is given below. The average marks of two Sessional exams shall be computed for internal assessment as per the requirements given in tables – X.

Sessional exam shall be conducted for 30 marks for theory and shall be computed for 15 marks. Similarly Sessional exam for practical shall be conducted for 40 marks and shall be computed for 10 marks.

Academic Progression:

- No student shall be admitted to any examination unless he/she fulfills the norms given in 6. Academic progression rules are applicable as follows:
- A student shall be eligible to carry forward all the courses of I, II and III semesters till the IV semester examinations. However, he/she shall not be eligible to attend the courses of V semester until all the courses of I and II semesters are successfully completed.
- A student shall be eligible to carry forward all the courses of III, IV and V semesters till the VI semester examinations. However, he/she shall not be eligible to attend the courses of VII semester until all the courses of I, II, III and IV semesters are successfully completed.
- A student shall be eligible to carry forward all the courses of V, VI and VII semesters till the VIII semester examinations. However, he/she shall not be eligible to get the course completion certificate until all the courses of I, II, III, IV, V and VI semesters are successfully completed.
- A student shall be eligible to get his/her CGPA upon successful completion of the courses of I to VIII semesters within the stipulated time period as per the norms specified in 26.
- A lateral entry student shall be eligible to carry forward all the courses of III, IV and V semesters till the VI semester examinations. However, he/she shall not be eligible to attend the courses of VII semester until all the courses of III and IV semesters are successfully completed.
- A lateral entry student shall be eligible to carry forward all the courses of V, VI and VII semesters till the VIII semester examinations. However, he/she shall not be eligible to get the course completion certificate until all the courses of III, IV, V and VI semesters are successfully completed.
- A lateral entry student shall be eligible to get his/her CGPA upon successful completion of the courses of III to VIII semesters within the stipulated time period as per the norms specified in 26.
- Any student who has given more than 4 chances for successful completion of I / III semester courses and more than 3 chances for successful completion of II / IV semester courses shall be permitted to attend V / VII semester classes ONLY during the subsequent academic year as the case may be. In simpler terms there shall NOT be any ODD BATCH for any semester.

Note: Grade AB should be considered as failed and treated as one head for deciding academic progression. Such rules are also applicable for those students who fail to register for examination(s) of any course in any semester

Project work

All the students shall undertake a project under the supervision of a teacher and submit a report. The area of the project shall directly relate any one of the elective subject opted by the student in semester VIII. The project shall be carried out in group not exceeding 5 in number. The project report shall be submitted in triplicate (typed & bound copy not less than 25 pages).

The internal and external examiner appointed by the University shall evaluate the project at the time of the Practical examinations of other semester(s). Students shall be evaluated in groups for four Hours (i.e., about half an Hour for a group of five students). The projects shall be evaluated as per the criteria given below.

Evaluation of Dissertation Book:

Objective(s) of the work done 15 Marks

Methodology adopted 20 Marks

Results and Discussions 20 Marks

Conclusions and Outcomes 20 Marks

Total 75 Marks

Evaluation of Presentation:

Presentation of work 25 Marks

Communication skills 20 Marks

Question and answer skills 30 Marks

Total 75 Marks

Explanation: The 75 marks assigned to the dissertation book shall be same for all the students in a group. However, the 75 marks assigned for presentation shall be awarded based on the performance of individual students in the given criteria.

Attendance**ACADEMIC INSTRUCTIONS**

A student shall have to attend 80% of the scheduled periods in each course in a semester; otherwise he / she shall not be allowed to appear in that course in the University examination and shall be detained in the course(s). The University may condone attendance shortage in special circumstances (as specified by the Guru Kashi University authorities). A student detained in the course(s) would be allowed to appear in the subsequent university examination(s) only on having completed the attendance in the program, when the program is offered in a regular semester(s) or otherwise as per the PCI guidelines.

Assessment of a course

Each course shall be assessed out of 100 marks. The distribution of these 100 marks is given in subsequent sub sections (as per PCI guidelines).

	Internal (25)			External (75)	Total
Component s	Continuous Assessment	MST 1	MST2	ETE	
Weightage	10	15	15	75	
Average Weightage	10	15		75	100

Passing Criteria

The students have to pass both in internal and external examinations. The minimum passing marks to clear in examination is 50% of the total marks as per PCI guidelines.

Note:

Lateral entry students have to appear for

- BP105T Communication Skill(Theory)
- BP111P Communication Skill(Practical)
- BP205T Computer application in Pharmacy(Theory)
- BP210P Computer application in Pharmacy (Practical) in their 3rd and 4th semester as per PCI guidelines.

SEMESTER: I

Course Title: HUMAN ANATOMY AND PHYSIOLOGY I
Course Code: BP101T

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On completion of this course, the successful students will be able to:

- 1 Understand anatomical terms to recognize and characterize positions of major organs of human body systems
- 2 Apply medical terminology and functionality of body systems in health education and health promotion.
- 3 Analyze disorders of skeletal muscle, smooth muscle, cardiovascular system, lymphatic system and digestive system.
- 4 Evaluate Bleeding time, clotting time, Blood group of various individuals
- 5 Develop advanced physiological and health-related tests using their skills

Course Content**Unit I****10 Hours****Introduction to Human body**

Definition and scope of anatomy and physiology, levels of structural organization and body systems, basic life processes, homeostasis, basic anatomical terminology.

Cellular level of organization

Structure and functions of cell, transport across cell membrane, cell division, cell junctions. General principles of cell communication, intracellular signaling pathway activation by extracellular signal molecule, Forms of intracellular signaling: a) Contact-dependent b) Paracrine c) Synaptic d) Endocrine

Tissue level of organization

Classification of tissues, structure, location and functions of epithelial, muscular and nervous and connective tissues.

Unit II**10 Hours****Integumentary system**

Structure and functions of skin

Skeletal system

Divisions of skeletal system, types of bone, salient features and functions of bones of axial and appendicular skeletal system

Organization of skeletal muscle, physiology of muscle contraction, neuromuscular junction.

Joints

Structural and functional classification, types of joints movements and its articulation

Unit III

10 Hours

Body fluids and blood

Body fluids, composition and functions of blood, hemopoiesis, formation of hemoglobin, anemia, mechanisms of coagulation, blood grouping, Rh factors, transfusion, its significance and disorders of blood, Reticulo endothelial system.

Lymphatic system

Lymphatic organs and tissues, lymphatic vessels, lymph circulation and functions of lymphatic system.

Unit IV

08 Hours

Peripheral nervous system:

Classification of peripheral nervous system: Structure and functions of sympathetic and parasympathetic nervous system.
Origin and functions of spinal and cranial nerves.

Special senses

Structure and functions of eye, ear, nose and tongue and their disorders.

Unit V

07 Hours

Cardio vascular system

Heart – anatomy of heart, blood circulation, blood vessels, structure and functions of artery, vein and capillaries, elements of conduction system of heart and heartbeat, its regulation by autonomic nervous system, cardiac output, cardiac cycle. Regulation of blood pressure, pulse, electrocardiogram and disorders of heart.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books:

1. K. Sembulingam and P. Sembulingam (2012). Essentials of Medical Physiology, Jaypee brothers Medical Publishers, NewDelhi.
2. Dr. C.C.Chatterjee (2018). Human Physiology.Vol 1,2, Academic PublishersKolkata

SEMESTER: I

Course Title: PHARMACEUTICAL ANALYSIS I
Course Code: BP102T

L	T	P	Credits
3	1	0	4

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand qualitative, quantitative and semi-quantitative estimation.
- 2 Comprehend the principles of volumetric and electro chemical analysis.
- 3 Develop analytical skills.
- 4 Check the purity and strength of the drug formulations.
- 5 Cognize the different separation techniques and their applications in analysis of drugs

Course Content**Unit-I****10 Hours****(a) Pharmaceutical analysis-**

Definition and scope

- i) Different techniques of analysis
 - ii) Methods of expressing concentration
 - iii) Primary and secondary standards.
 - iv) Preparation and standardization of various molar and normal solutions- Oxalic acid, sodium hydroxide, hydrochloric acid, sodium thiosulphate, sulphuric acid, potassium permanganate and ceric ammonium sulphate
- (b) Errors:** Sources of errors, types of errors, methods of minimizing errors, accuracy, precision and significant figures
- (c) Pharmacopoeia,** Sources of impurities in medicinal agents, limit tests.

Unit-II**10 Hours**

Acid base titration: Theories of acid base indicators, classification of acid base titrations and theory involved in titrations of strong, weak, and very weak acids and bases, neutralization curves.

Non aqueous titration: Solvents, acidimetry and alkalimetry titration and estimation of Sodium benzoate and Ephedrine HCl.

Unit-III**10 Hours**

Precipitation titrations: Mohr's method, Volhard's, Modified Volhard's, Fajans method, estimation of sodium chloride.

Complexometric titration: Classification, metal ion indicators, masking and demasking reagents, estimation of Magnesium sulphate, and calcium gluconate.

Gravimetry: Principle and steps involved in gravimetric analysis. Purity of the precipitate: co-precipitation and post precipitation, Estimation of barium

sulphate.

Basic Principles, methods and application of diazotisation titration.

UNIT-IV

08 Hours

Redox titrations

- (a) Concepts of oxidation and reduction
- (b) Types of redox titrations (Principles and applications) Cerimetry, Iodimetry, Iodometry, Bromatometry, Dichrometry, and Titration with potassium iodate.

Unit-V

07 Hours

Electrochemical methods of analysis

Conductometry- Introduction, Conductivity cell, Conductometric titrations, applications. **Potentiometry** - Electrochemical cell, construction and working of reference (Standard hydrogen, silver chloride electrode and calomel electrode) and indicator electrodes (metal electrodes and glass electrode), methods to determine end point of potentiometric titration and applications.

Polarography - Principle, Ilkovic equation, construction and working of dropping mercury electrode and rotating platinum electrode, applications.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. A.I. Vogel (1978), Text Book of Quantitative Inorganic Analysis, J.Bassett et.al London.
2. Indian Pharmacopoeia (2018)

SEMESTER: I

Course Title: PHARMACEUTICS-I
Course Code: BP103T

L	T	P	Credits
3	1	0	4

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the Formulation of dosage forms
- 2 Apply the methods of preparation of extracts and principle of infusion, decoction etc.
- 3 Analyze Resolve the problems through the application of fundamental principles of pharmaceutical metrology and conclude the decision.
- 4 Evaluate the Pharmacopeial standards for the preparation of various dosages forms.
- 5 Create the mouth washes, syrups

Course Content:**Unit – I 10 Hours**

Historical background and development of profession of pharmacy: History of profession of Pharmacy in India in relation to pharmacy education, industry and organization, Pharmacy as a career, Pharmacopoeias: Introduction to IP, BP, USP and Extra Pharmacopoeia.

Dosage forms: Introduction to dosage forms, classification and definitions

Prescription: Definition, Parts of prescription, handling of Prescription and Errors in prescription.

Posology: Definition, Factors affecting posology. Pediatric dose calculations based on age, body weight and body surface area.

Unit – II 10 Hours

Pharmaceutical calculations: Weights and measures – Imperial & Metric system, Calculations involving percentage solutions, alligation, proof spirit and isotonic solutions based on freezing point and molecular weight.

Powders: Definition, classification, advantages and disadvantages, Simple & compound powders – official preparations, dusting powders, effervescent, efflorescent and hygroscopic powders, eutectic mixtures. Geometric dilutions.

Liquid dosage forms: Advantages and disadvantages of liquid dosage forms. Excipients used in formulation of liquid dosage forms. Solubility enhancement techniques.

Unit – III 08 Hours

Monophasic liquids: Definitions and preparations of Gargles, Mouthwashes, Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments and Lotions.

Biphasic liquids:

Suspensions: Definition, advantages and disadvantages, classifications,

Preparation of suspensions; Flocculated and Deflocculated suspension & stability problems and methods to overcome.

Emulsions: Definition, classification, emulsifying agent, test for the identification of type of Emulsion, Methods of preparation & stability problems and methods to overcome.

Unit – IV

08 Hours

Suppositories: Definition, types, advantages and disadvantages, types of bases, methods of preparations. Displacement value & its calculations, evaluation of suppositories.

Pharmaceutical incompatibilities: Definition, classification, physical, chemical and therapeutic incompatibilities with examples.

Unit – V

07 Hours

Semisolid dosage forms: Definitions, classification, mechanisms and factors influencing dermal penetration of drugs. Preparation of ointments, pastes, creams and gels. Excipients used in semisolid dosage forms. Evaluation of semisolid dosages forms.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books:

1. Lachmann (2020). Theory and Practice of Industrial Pharmacy, Lea&FebigerPublisher, The University ofMichigan.
2. Indian Pharmacopoeia (2018).
3. British Pharmacopoeia (2019).
4. Alfonso R. Gennaro Remington (2006). The Science and Practice of Pharmacy, Lippincott Williams, NewDelhi.

SEMESTER: I

Course Title: Pharmaceutical Inorganic Chemistry
Course Code: BP104T

L	T	P	Credits
3	1	0	4

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Deals with monograph of inorganic drug and pharmaceuticals.
- 2 Recognize acid base and buffers.
- 3 Familiarize with a variety of inorganic drug classes
- 4 Clarify topical agents, gases and vapors, dental products and radio pharmaceuticals
- 5 Get Awareness about the sources of impurities

Course Content**Unit I****10 Hours**

Impurities in pharmaceutical substances: History of Pharmacopoeia, Sources and types of impurities, principle involved in the limit test for Chloride, Sulphate, Iron, Arsenic, Lead and Heavy metals, modified limit test for Chloride and Sulphate

General methods of preparation, assay for the compounds superscripted with **asterisk (*)**, properties and medicinal uses of inorganic compounds belonging to the following classes.

Unit II**10 Hours**

Acids, Bases and Buffers: Buffer equations and buffer capacity in general, buffers in pharmaceutical systems, preparation, stability, buffered isotonic solutions, measurements of tonicity, calculations and methods of adjusting isotonicity.

Major extra and intracellular electrolytes: Functions of major physiological ions, Electrolytes used in the replacement therapy: Sodium chloride*, Potassium chloride, Calcium gluconate* and Oral Rehydration Salt (ORS), Physiological acid base balance.

Dental products: Dentifrices, role of fluoride in the treatment of dental caries, Desensitizing agents, Calcium carbonate, Sodium fluoride, and Zinc eugenol cement.

Unit III**10 Hours****Gastrointestinal agents**

Acidifiers: Ammonium chloride* and Dil. HCl

Antacid: Ideal properties of antacids, combinations of antacids, Sodium Bicarbonate*, Aluminum hydroxide gel, Magnesium hydroxide mixture

Cathartics: Magnesium sulphate, Sodium orthophosphate, Kaolin and Bentonite

Antimicrobials: Mechanism, classification, Potassium permanganate, Boric acid, Hydrogen peroxide*, Chlorinated lime*, Iodine and its

preparations.

Unit IV

08 Hours

Miscellaneous compounds

Expectorants: Potassium iodide, Ammonium chloride*. **Emetics:** Copper sulphate*, Sodium potassium tartarate **Haematinics:** Ferrous sulphate*, Ferrous gluconate

Poison and Antidote: Sodium thiosulphate*, Activated charcoal, Sodium nitrite

Astringents: Zinc Sulphate, Potash Alum

UNIT V

07 Hours

Radiopharmaceuticals: Radio activity, Measurement of radioactivity, Properties of α , β , γ radiations, Half-life, radio isotopes and study of radio isotopes - Sodium iodide I^{131} , Storage conditions, precautions & pharmaceutical application of radioactive substances.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Anand & Chatwal (2018). Inorganic Pharmaceutical Chemistry, Himalaya Publishing House.
2. A.H. Beckett & J.B. Stenlake's (2005). Practical Pharmaceutical Chemistry Vol 1, 2. Stahlone Press of University of London
3. A.I. Vogel (1989). Text Book of Quantitative Inorganic Analysis
4. Indian Pharmacopoeia (2018)

SEMESTER: I

Course Title: COMMUNICATION SKILLS
Course Code: BP105T

L	T	P	Credits
2	0	0	2

Total: 30 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Improve proof-reading skills and language awareness so that one can spot mistakes and correct their own work
- 2 Comprehend the behavioral needs for a pharmacist to function effectively in the areas of pharmaceutical operation.
- 3 Develop interview skills
- 4 Communicate effectively (Verbal and Non-Verbal)
- 5 Improve writing skills

Course content:**Unit – I** **07 Hours**

Communication Skills: Introduction, Definition, The Importance of Communication, The Communication Process – Source, Message, Encoding, Channel, Decoding, Receiver, Feedback, Context.

Barriers to communication: Physiological Barriers, Physical Barriers, Cultural Barriers, Language Barriers, Gender Barriers, Interpersonal Barriers, Psychological Barriers, Emotional barriers

Perspectives in Communication: Introduction, Visual Perception, Language, Other factors affecting our perspective - Past Experiences, Prejudices, Feelings, Environment.

Unit – II **07 Hours**

Elements of Communication: Introduction, Face to Face Communication - Tone of Voice, Body Language (Non-verbal communication), Verbal Communication, Physical Communication

Communication Styles: Introduction, The Communication Styles Matrix with example for each -Direct Communication Style, Spirited Communication Style, Systematic Communication Style, Considerate Communication Style.

Unit – III **07 Hours**

Basic Listening Skills: Introduction, Self-Awareness, Active Listening, Becoming an Active Listener, Listening in Difficult Situations

Effective Written Communication: Introduction, When and When Not to Use Written Communication - Complexity of the Topic, Amount of Discussion' Required, Shades of Meaning, Formal Communication

Writing Effectively: Subject Lines, Put the Main Point First, Know Your Audience, Organization of the Message.

Unit – IV **05 Hours**

Interview Skills: Purpose of an interview, Do's and Dont's of an interview

Giving Presentations: Dealing with Fears, Planning your Presentation,

Structuring Your Presentation, Delivering Your Presentation, Techniques of Delivery

Unit – V

04 Hours

Group Discussion: Introduction, Communication skills in group discussion, Do's and Dont's of group discussion.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books

1. Andreja. J. Ruther Ford (2011). Basic communication skills for Technology, Pearson Education.
2. Communication skills (2011). Sanjay Kumar, Pushpalata, OxfordPress,
3. Stephen .P. Robbins (2013).Organizational Behaviour, 1st Edition, Pearson

SEMESTER: I**Course Title: REMEDIAL BIOLOGY****Course Code: BP106RBT**

L	T	P	Credits
2	0	0	2

Total: 30 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the basic concept of plant morphology.
- 2 Study the morphology of flowering plant.
- 3 Be familiar with Theory of evolution
- 4 Understand Cell biology (Basic Nature of Plant cell and Animal cell)

Course Content**Unit I****07 Hours****Living world:**

Definition and characters of living organisms Diversity in the living world
Binomial nomenclature

Five kingdoms of life and basis of classification. Salient features of Monera, Protista, Fungi, Animalia and Plantae, Virus,

Morphology of Flowering plants

Morphology of different parts of flowering plants – Root, stem, inflorescence, flower, leaf, fruit, seed.

General Anatomy of Root, stem, leaf of monocotyledons & Dicotylidones.

Unit II**07 Hours****Body fluids and circulation**

Composition of blood, blood groups, coagulation of blood Composition and functions of lymph

Human circulatory system

Structure of human heart and blood vessels Cardiac cycle, cardiac output and ECG

Digestion and Absorption

Human alimentary canal and digestive glands Role of digestive enzymes

Digestion, absorption and assimilation of digested food

Breathing and respiration

Human respiratory system

Mechanism of breathing and its regulation Exchange of gases, transport of gases and regulation of respiration Respiratory volumes

Unit III**07 Hours**

Modes of excretion

Human excretory system- structure and function Urine formation

Rennin angiotensin system

Neural control and coordination

Definition and classification of nervous system Structure of a neuron
Generation and conduction of nerve impulse Structure of brain and spinal cord

Functions of cerebrum, cerebellum, hypothalamus and medulla oblongata

Chemical coordination and regulation

Endocrine glands and their secretions

Functions of hormones secreted by endocrine glands

Human reproduction

Parts of female reproductive system Parts of male reproductive system

Spermatogenesis and Oogenesis Menstrual cycle

Unit IV

05 Hours

Plants and mineral nutrition:

Essential mineral, macro and micronutrients

Nitrogen metabolism, Nitrogen cycle, biological nitrogen fixation

Photosynthesis

Autotrophic nutrition, photosynthesis, Photosynthetic pigments,

Factors affecting photosynthesis.

Unit V

04 Hours

Plant respiration: Respiration, glycolysis, fermentation (anaerobic).

Plant growth and development

Phases and rate of plant growth, Condition of growth. Introduction to plant growth regulators

Cell - The unit of life

Structure and functions of cell and cell organelles. Cell division

Tissues

Definition, types of tissues, location and functions.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Reference books:

1. S. B. Gokhale (2008). Text book of Biology. Pragtai Books Pvt.Ltd.
2. Dr. Thulajappa and Dr. Seetaram (2015). A Text book of Biology. Cengage Learning India Private Ltd.

SEMESTER: I

Course Title: REMEDIAL MATHEMATICS
Course Code: BP106RMT

L	T	P	Credits
2	0	0	2

Total: 30 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Deal with introduction of partial fraction, logarithm, matrix, Calculus.
- 2 Apply mathematical concepts and principles to perform computations for Pharmaceutical Sciences.
- 3 Create, use and analyze mathematical representations and mathematical relationships
- 4 Communicate mathematical knowledge and understanding to help in the field of Clinical Pharmacy

Course Content**Unit – I****06 Hours****Partial fraction**

Introduction, Polynomial, Rational fractions, Proper and Improper fractions, Partial fraction, Resolving into Partial fraction, Application of Partial Fraction in Chemical Kinetics and Pharmacokinetics

Logarithms

Introduction, Definition, Theorems/Properties of logarithms, Common logarithms, Characteristic and Mantissa, worked examples, application of logarithm to solve pharmaceutical problems.

• Function:

Real Valued function, Classification of real valued functions,

Limits and continuity:

Introduction, Limit of a function, Definition of limit of function (-definition)

$$\lim_{x \rightarrow a} \frac{x^n - a^n}{x - a} = na^{n-1}, \quad \lim_{\theta \rightarrow 0} \frac{\sin \theta}{\theta} = 1,$$

Unit –II**06 Hours****Matrices and Determinant:**

Introduction matrices, Types of matrices, Operation on matrices, Transpose of a matrix, Matrix Multiplication, Determinants, Properties of determinants, Product of determinants, Minors and co-Factors, Adjoint or adjugate of a square matrix, Singular and non-singular matrices, Inverse of a matrix, Solution of system of linear of equations using matrix method, Cramer's rule, Characteristic equation and roots of a square matrix, Cayley–Hamilton theorem, Application of Matrices in solving Pharmacokinetic equations

Unit – III**06 Hours**

Differentiation : Introductions, Derivative of a function, Derivative of a constant, Derivative of a product of a constant and a function, Derivative of the sum or difference of two functions, Derivative of the product of two functions (product formula), Derivative of the quotient of two functions (Quotient formula) – **Without Proof**, Derivative of $x^{n/r}$, where n is any rational number, Derivative of e^x , Derivative of $\log_e x$, Derivative of $\sin x$, Derivative of trigonometric functions from first principles (**without Proof**), Successive Differentiation, Conditions for a function to be a maximum or a minimum at a point. Application

Unit – IV**06 Hours****Analytical Geometry**

Introduction: Signs of the Coordinates, Distance formula,

Straight Line: Slope or gradient of a straight line, Conditions for parallelism and perpendicularity of two lines, Slope of a line joining two points, Slope – intercept form of a straight line

Integration:

Introduction, Definition, Standard formulae, Rules of integration, Method of substitution, method of Partial fractions, Integration by parts, definite integrals, application.

Unit-V**06 Hours**

Differential Equations: Some basic definitions, Order and degree, Equations in separable form, Homogeneous equations, Linear Differential equations, Exact equations,

**Application in solving
Pharmacokinetic
equations**

Laplace Transform: Introduction, Definition, Properties of Laplace transform, Laplace Transforms of elementary functions, Inverse Laplace transforms, Laplace transform of derivatives, Application to solve Linear differential equations, Application in solving Chemical kinetics and Pharmacokinetics equations.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Edition)

1. Panchaksharappa Gowda D.H (2014). Pharmaceutical Mathematics with application to Pharmacy

SEMESTER: I

Course Title: HUMAN ANATOMY AND PHYSIOLOGY I
Course Code: BP107P

L	T	P	Credits
0	0	4	4

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the construction, working, care and handling of instruments, glassware and equipment required for practical
- 2 Apply body fluids and blood knowledge in Hemoglobin detection and measurement of blood pressure.
- 3 Analyze working pattern of different organs of each system.
- 4 Evaluate pulse rate, heart rate, erythrocyte sedimentation rate
- 5 Develop reports of white blood cells and red blood cells count

Course Content

1. Study of compound microscope.
2. Microscopic study of epithelial and connective tissue
3. Microscopic study of muscular and nervous tissue
4. Identification of axial bones
5. Identification of appendicular bones
6. Introduction to hemocytometry.
7. Enumeration of white blood cell (WBC) count
8. Enumeration of total red blood corpuscles (RBC) count
9. Determination of bleeding time
10. Determination of clotting time
11. Estimation of hemoglobin content
12. Determination of blood group.
13. Determination of erythrocyte sedimentation rate (ESR).
14. Determination of heart rate and pulse rate.
15. Recording of blood pressure.

Recommended Books (Latest Editions)

1. K. Sembulingam and P. Sembulingam (2012). Essentials of Medical Physiology, Jaypee Brothers Medical Publishers, New Delhi.
2. Dr. C.C. Chatterjee (2018). Human Physiology. Vol 1,2, Academic Publishers Kolkata

SEMESTER: I

Course Title: PHARMACEUTICAL ANALYSIS-I
Course Code: BP108P

L	T	P	Credits
0	0	4	2

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Perform limit test, preparation, standardization and determination of Normality.
- 2 Carryout various volumetric and electrochemical titrations.
- 3 Develop analytical skills.
- 4 Perform analysis of drugs using Fluorimetry, nepheloturbidimetry and flame photometry
- 5 Cognize the different separation techniques and their applications in analysis of drugs

Course Content**I Limit Test of the following**

- (1) Chloride
- (2) Sulphate
- (3) Iron
- (4) Arsenic

II Preparation and standardization of

- (1) Sodium hydroxide
- (2) Sulphuric acid
- (3) Sodium thiosulfate
- (4) Potassium permanganate
- (5) Ceric ammonium sulphate

III Assay of the following compounds along with Standardization of Titrant

- (1) Ammonium chloride by acid base titration
- (2) Ferrous sulphate by Cerimetry
- (3) Copper sulphate by Iodometry
- (4) Calcium gluconate by complexometry
- (5) Hydrogen peroxide by Permanganometry
- (6) Sodium benzoate by non-aqueous titration
- (7) Sodium Chloride by precipitation titration

IV Determination of Normality by electro-analytical methods

- (1) Conductometric titration of strong acid against strong base
- (2) Conductometric titration of strong acid and weak acid against strong base
- (3) Potentiometric titration of strong acid against strong base

Recommended Books: (Latest Editions)

1. A.I. Vogel (1978), Text Book of Quantitative Inorganic Analysis, J. Bassett et al. London.
2. Indian Pharmacopoeia (2018)

SEMESTER: I

Course Title: PHARMACEUTICS-I
Course Code: BP109P

L	T	P	Credits
0	0	4	2

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the Formulation of dosage forms
- 2 Apply the methods of preparation of extracts and principle of infusion, decoction etc.
- 3 Analyze and Resolve the problems through the application of fundamental principles of pharmaceutical metrology and conclude the decision.
- 4 Evaluate the Pharmacopeial standards for the preparation of various dosage forms.
- 5 Create the mouthwashes, syrups

Course Content**1. Syrups**

- a) Syrup IP'66
- b) Compound syrup of Ferrous Phosphate BPC'68

2. Elixirs

- a) Piperazine citrate elixir
- Paracetamol pediatric elixir

3. Linctus

- a) Terpin Hydrate Linctus IP'66
- b) Iodine Throat Paint (Mandel's Paint)

4. Solutions

- a) Strong solution of ammoniumacetate
- b) Cresol with soap solution
- c) Lugol's solution

5. Suspensions

- a) Calamine lotion
- b) Magnesium Hydroxide mixture
 - c) Aluminum Hydroxide gel

6. Emulsions

- a) Turpentine Liniment
- b) Liquid paraffin emulsion

7. Powders and Granules

- a) ORS powder (WHO)
- b) Effervescent granules
- c) Dusting powder
- d) Divided powders

8. Suppositories

- a) Glycero gelatin suppository
- b) Cocoa butter suppository
- c) Zinc Oxide suppository

9. Semisolids

- a) Sulphur ointment
- b) Non staining-iodine ointment with methylsalicylate
- c) Carbopal gel

10. Gargles and Mouthwashes

- a) Iodine gargle
- b) Chlorhexidine mouthwash

Recommended Books: (Latest Editions)

1. Lachmann (2020). Theory and Practice of Industrial Pharmacy, Lea & Febiger Publisher, The University of Michigan.
2. Indian Pharmacopoeia (2018).
3. British Pharmacopoeia (2019).
4. Alfonso R. Gennaro Remington (2006). The Science and Practice of Pharmacy, Lippincott Williams, New Delhi.

SEMESTER: I**Course Title: PHARMACEUTICAL INORGANIC CHEMISTRY****Course Code: BP110P**

L	T	P	Credits
0	0	4	2

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Know about identification, purity and limit tests.
- 2 Develop information of preparation of inorganic pharmaceuticals
- 3 Get Awareness about the sources of impurities
- 4 Acquire Knowledge about methods of determination of the impurities in inorganic drugs and pharmaceuticals
- 5 Familiarize with a variety of inorganic drug classes

Course Content**I. Limit tests for following ions**

Limit test for Chlorides and Sulphates Modified limit test for Chlorides and Sulphates
 Limit test for Iron
 Limit test for Heavy metals
 Limit test for Lead
 Limit test for Arsenic

II. Identification test Magnesium hydroxide Ferrous sulphate Sodium bicarbonate Calcium gluconate Coppersulphate**III. Test for purity**

Swelling power of Bentonite
 Neutralizing capacity of aluminum hydroxide gel
 Determination of potassium iodate and iodine in potassium Iodide

IV. Preparation of inorganic pharmaceuticals

Boric acid
 Potash alum ferrous sulphate

Recommended Books (Latest Editions)

1. Anand & Chatwal (2018). Inorganic Pharmaceutical Chemistry, Himalaya Publishing House.
2. A.H. Beckett & J.B. Stenlake's (2005). Practical Pharmaceutical Chemistry Vol1, 2. Stahlone Press of University of London
3. A.I. Vogel (1989). Text Book of Quantitative Inorganic analysis
4. Indian Pharmacopoeia (2018).

SEMESTER: I**Course Title: COMMUNICATION SKILLS****Course Code: BP111P**

L	T	P	Credits
0	0	2	1

Total: 30 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Acquire modules that are to be conducted using English language lab software.
- 2 Comprehend the behavioral needs for a Pharmacist to function efficiently.
- 3 Establish the team as an effective team player

Course Content**Basic communication covering the following topics**

Meeting People
 Asking Questions
 Making Friends
 What did you do?
 Dos and Dont's

Pronunciations covering the following topics

Pronunciation and Nouns
 Pronunciation (Consonant Sounds)
 Pronunciation (Vowel Sounds)

Advanced Learning

Listening Comprehension / Direct and Indirect Speech Figures of Speech
 Effective Communication Writing Skills
 Effective Writing Interview Handling Skills E-Mail etiquette Presentation Skills

Recommended Books

1. Andreja. J. Ruther Ford (2011). Basic communication skills for Technology, Pearson Education,.
2. Communication skills (2011). Sanjay Kumar, Pushpalata, OxfordPress,
3. Stephen .P. Robbins (2013).Organizational Behaviour, 1stEdition, Pearson.

SEMESTER: I**Course Title: REMEDIAL BIOLOGY****Course Code: BP112RBP**

L	T	P	Credits
0	0	2	1

Total: 30 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand microscopic study and identification of tissues Study of cell, Stem, Root, Leaf, seed, fruit, and flower.
- 2 Carry out detailed study of frog by using computer models
- 3 Perform determination of blood group and check blood pressure and tidal volume.
- 4 Solve different type of problems by applying theory

Course Content

1. Introduction to experiments in biology
 - a) Study of Microscope
 - b) Section cutting techniques
 - c) Mounting and staining
 - d) Permanent slide preparation
2. Study of cell and its inclusions
3. Study of Stem, Root, Leaf, seed, fruit, flower and their modifications
4. Detailed study of frog by using computer models
5. Microscopic study and identification of tissues pertinent to Stem, Root, Leaf, seed, fruit and flower
6. Identification of bones
7. Determination of blood group
8. Determination of blood pressure
9. Determination of tidal volume

Reference Books

1. S.B.Gokhale, C.K.Kokate and S.P.Shriwastava (2007). A Manual of Pharmaceutical Biology Practical. Nirali Prakashan.

SEMESTER: II

Course Title: HUMAN ANATOMY AND PHYSIOLOGY-II

L	T	P	Credits
3	1	0	4

Course Code: BP201T

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Know about the various tissues and organs of different systems of human body.
- 2 Analyze the relevance and significance of Human Anatomy and Physiology to Pharmaceutical Sciences
- 3 Perform the hematological tests like blood cell counts, hemoglobin estimation etc and also record blood pressure, heart rate, pulse and respiratory volume
- 4 Inspect Homeostatic mechanisms and their imbalances in the human body
- 5 Determine the proper care for each individual patient and their specific symptoms.

Course Content**Unit I****10 Hours****Nervous system**

Organization of nervous system, neuron, neuroglia, classification and properties of nerve fibre, electrophysiology, action potential, nerve impulse, receptors, synapse, neurotransmitters.

Central nervous system: Meninges, ventricles of brain and cerebrospinal fluid, structure and functions of brain (cerebrum, brain stem, and cerebellum), spinal cord (gross structure, functions of afferent and efferent nerve tracts, reflex activity)

Unit II**10 Hours****Digestive system**

Anatomy of GI Tract with special reference to anatomy and functions of stomach, (Acid production in the stomach, regulation of acid production through parasympathetic nervous system, pepsin role in protein digestion) small intestine and large intestine, anatomy and functions of salivary glands, pancreas and liver, movements of GIT, digestion and absorption of nutrients and disorders of GIT.

Energetics

Formation and role of ATP, Creatinine Phosphate and BMR.

Unit III**10 Hours****Respiratory system**

Anatomy of respiratory system with special reference to anatomy of lungs, mechanism of respiration, regulation of respiration Lung Volumes and

capacities transport of respiratory gases, artificial respiration, and resuscitation methods.

Urinary system

Anatomy of urinary tract with special reference to anatomy of kidney and nephrons, functions of kidney and urinary tract, physiology of urine formation, micturition reflex and role of kidneys in acid base balance, role of RAS in kidney and disorders of kidney.

Unit IV

10 Hours

Endocrine system

Classification of hormones, mechanism of hormone action, structure and functions of pituitary gland, thyroid gland, parathyroid gland, adrenal gland, pancreas, pineal gland, thymus and their disorders.

Unit V

09 Hours

Reproductive system

Anatomy of male and female reproductive system, Functions of male and female reproductive system, sex hormones, physiology of menstruation, fertilization, spermatogenesis, oogenesis, pregnancy and parturition

Introduction to genetics

Chromosomes, genes and DNA, protein synthesis, genetic pattern of inheritance

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books:

1. K. Sembulingam and P. Sembulingam (2012). Essentials of Medical Physiology, Jaypee brother's medical publishers, New Delhi.
2. Dr. C.C.Chatterjee (2018). Human Physiology.Vol 1, 2, Academic PublishersKolkata

SEMESTER: II**Course Title: PHARMACEUTICAL ORGANIC CHEMISTRY –I****Course Code: BP202T**

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Learn the classification of organic compounds on the basis of functional group and IUPAC nomenclature of different organic compounds.
- 2 Apply concepts of organic chemistry related to hybridization, types of bonds and isomerism, Methods of preparation, elimination and addition reactions of different compounds
- 3 Identify/confirm the identification of organic compound
- 4 Examine various techniques of purification of the synthesized compounds using precipitation or recrystallization
- 5 Explore molecules and compounds.

Course Content:**UNIT-I****07 Hours****Classification, nomenclature and isomerism**

Classification of Organic Compounds Common and IUPAC systems of nomenclature of organic compounds (up to 10 Carbons open chain and carbocyclic compounds) Structural isomerisms in organic compounds

UNIT-II**10 Hours****Alkanes*, Alkenes* and Conjugated dienes***

SP³ hybridization in alkanes, Halogenation of alkanes, uses of paraffins. Stabilities of alkenes, SP² hybridization in alkenes

E1 and E2 reactions – kinetics, order of reactivity of alkyl halides, rearrangement of carbocations, Saytzeffs orientation and evidences. E1 versus E2 reactions, Factors affecting E1 and E2 reactions.

Ozonolysis, electrophilic addition reactions of alkenes, Markownikoff's orientation, free radical addition reactions of alkenes, Anti Markownikoff's orientation.

Stability of conjugated dienes, Diel-Alder, electrophilic addition, free radical addition reactions of conjugated dienes, allylic rearrangement

UNIT-III**10 Hours****Alkyl halides***

SN1 and SN2 reactions - kinetics, order of reactivity of alkyl halides, stereochemistry and rearrangement of carbocations.

SN1 versus SN2 reactions, Factors affecting SN1 and SN2 reactions
Structure and uses of ethylchloride, Chloroform, trichloroethylene, tetrachloroethylene, dichloromethane, tetrachloromethane and iodoform.

Alcohols*- Qualitative tests, Structure and uses of Ethyl alcohol, Methyl alcohol, chlorobutanol, Cetosteryl alcohol, Benzyl alcohol, Glycerol, Propylene glycol

UNIT-IV**10 Hours****Carbonyl compounds* (Aldehydes and ketones)**

Nucleophilic addition, Electromeric effect, aldol condensation, Crossed Aldol condensation, Cannizzaro reaction, Crossed Cannizzaro reaction, Benzoin condensation, Perkin condensation, qualitative tests, Structure And uses of Formaldehyde, Paraldehyde, Acetone, Chloral hydrate, Hexamine, Benzaldehyde, Vanilin, Cinnamaldehyde.

UNIT-V**08 Hours****Carboxylic acids***

Acidity of carboxylic acids, effect of substituents on acidity, inductive effect and qualitative tests for carboxylic acids, amide and ester

Structure and Uses of Acetic acid, Lactic acid, Tartaric acid, Citric acid, Succinic acid. Oxalic acid, Salicylic acid, Benzoic acid, Benzyl benzoate, Dimethyl phthalate, Methyl salicylate and Acetyl salicylic acid

Aliphatic amines* - Basicity, effect of substituent on Basicity. Qualitative test, Structure and uses of Ethanolamine, Ethylenediamine, and Amphetamine

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Morrison and Boyd (2010). Organic Chemistry. Pearson.
2. Furniss S. Brian (2005). Vogel's text book of Practical Organic Chemistry. Pearson

SEMESTER: II**Course Title: PHARMACEUTICAL ORGANIC CHEMISTRY –I****Course Code: BP203T**

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Recognize role of biochemical processes and cell metabolism.
- 2 Implement basics like chemistry, function, classification, biological importance, qualitative tests & applications of various biomolecules. e.g. proteins, carbohydrates and lipids, etc
- 3 Detect and identify proteins, amino acids and carbohydrates by various qualitative as well as quantitative tests.
- 4 Estimate the fundamentals of metabolism, process, steps involved in metabolism of carbohydrates, lipids, protein and nucleic acid.
- 5 Construct tests used to detect infections, genetic disorders, and other diseases

Course Content**UNIT I****08 Hours****Biomolecules**

Introduction, classification, chemical nature and biological role of carbohydrate, lipids, nucleic acids, amino acids and proteins.

Bioenergetics

Concept of free energy, endergonic and exergonic reaction, Relationship between free energy, enthalpy and entropy; Redoxpotential.

Energy rich compounds; classification; biological significances of ATP and cyclic AMP

UNIT II**10 Hours****Carbohydrate metabolism**

Glycolysis – Pathway, energetics and significance Citric acid cycle- Pathway, energetics and significance

HMP shunt and its significance; Glucose-6-Phosphate dehydrogenase (G6PD) deficiency Glycogen metabolism Pathways and glycogen storage diseases (GSD) Gluconeogenesis- Pathway and its significance

Hormonal regulation of blood glucose level and Diabetes mellitus

Biological oxidation

Electron transport chain (ETC) and its mechanism.

Oxidative phosphorylation & its mechanism and substrate phosphorylation

Inhibitors ETC and oxidative phosphorylation/Uncouplers level

UNIT III**10 Hours****Lipid metabolism**

B-Oxidation of saturated fatty acid (Palmitic acid) Formation and utilization of ketone bodies; ketoacidosis De novo synthesis of fatty acids (Palmitic acid) Biological significance of cholesterol and conversion of cholesterol into bile acids, steroid hormone and vitamin D Disorders of lipid metabolism: Hypercholesterolemia, atherosclerosis, fatty liver and obesity.

Amino acid metabolism

General reactions of amino acid metabolism: Transamination, deamination & decarboxylation, urea cycle and its disorders Catabolism of phenylalanine and tyrosine and their metabolic disorders (Phenylketonuria, Albinism, alcaptonuria, tyrosinemia) Synthesis and significance of biological substances; 5-HT, melatonin, dopamine, noradrenaline, adrenaline Catabolism of heme; hyperbilirubinemia and jaundice

UNIT IV**10 Hours****Nucleic acid metabolism and genetic information transfer**

Biosynthesis of purine and pyrimidine nucleotides Catabolism of purine nucleotides and Hyperuricemia and Gout disease Organization of mammalian genome Structure of DNA and RNA and their functions DNA replication (semi conservative model) Transcription or RNA synthesis Genetic code, Translation or Protein synthesis and inhibitors

UNIT V**07 Hours****Enzymes**

Introduction, properties, nomenclature and IUB classification of enzymes Enzyme kinetics (Michaelis plot, Line Weaver Burke plot) Enzyme inhibitors with examples Regulation of enzymes: enzyme induction and repression, allosteric enzymes regulation Therapeutic and diagnostic applications of enzymes and isoenzymes Coenzymes –Structure and biochemical functions

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Lehninger (2021). Principles of Biochemistry. W H Freeman & CO.
Robert K. Murry, Daryl K. Granner and Victor W. Rodwell (2020). Harper's Biochemistry. Vitae GenBiotech.

SEMESTER: II**Course Title: PATHOPHYSIOLOGY****Course Code: BP204T**

L	T	P	Credits
3	1	0	4

Learning Outcomes**Total: 45 Hours**

On successful completion of this course, the students will be able to:

- 1 Understand the etiology and pathogenesis of the selected disease states
- 2 Learn the signs and symptoms of the diseases
- 3 Define the etiology and pathogenesis of the selected disease states
- 4 Recognize the complications of the diseases

Course Content:**Unit I****10 Hours****Basic principles of Cell injury and Adaptation:**

Introduction, definitions, Homeostasis, Components and Types of Feedback systems, Causes of cellular injury, Pathogenesis (Cell membrane damage, Mitochondrial damage, Ribosome damage, Nuclear damage), Morphology of cell injury – Adaptive changes (Atrophy, Hypertrophy, hyperplasia, Metaplasia, Dysplasia), Cell swelling, Intra cellular accumulation, Calcification, Enzyme leakage and Cell Death Acidosis & Alkalosis, Electrolyte imbalance

Basic mechanism involved in the process of inflammation and repair:

Introduction, Clinical signs of inflammation, Different types of Inflammation, Mechanism of Inflammation – Alteration in vascular permeability and blood flow, migration of WBC's, Mediators of inflammation, Basic principles of wound healing in the skin, Pathophysiology of Atherosclerosis

Unit II**10 Hours****Cardiovascular System:**

Hypertension, congestive heart failure, ischemic heart disease (angina, myocardial infarction, atherosclerosis and arteriosclerosis)

Respiratory system: Asthma, Chronic obstructive airways diseases.

Renal system: Acute and chronic renal failure.

Unit III**10 Hours****Haematological Diseases:**

Iron deficiency, megaloblastic anemia (Vit B12 and folic acid), sickle cell anemia, thalasemia, hereditary acquired anemia, hemophilia

Endocrine system: Diabetes, thyroid diseases, disorders of sex hormones

Nervous system: Epilepsy, Parkinson's disease, stroke, psychiatric

Disorders: depression, schizophrenia and Alzheimer's disease.

Gastrointestinal system: Peptic Ulcer

Unit IV

08 Hours

Inflammatory bowel diseases, jaundice, hepatitis (A, B, C, D, E, F) alcoholic liver disease.

Disease of bones and joints: Rheumatoid arthritis, osteoporosis and gout

Principles of cancer: classification, etiology and pathogenesis of cancer

Diseases of bones and joints: Rheumatoid Arthritis, Osteoporosis, Gout

Principles of Cancer: Classification, etiology and pathogenesis of Cancer

Unit V

07 Hours

Infectious diseases: Meningitis, Typhoid, Leprosy, Tuberculosis Urinary tract infections

Sexually transmitted diseases: AIDS, Syphilis, Gonorrhoea

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Vinay Kumar, Abul K. Abas, Jon C. Aster; Robbins & Cotran (2014). Pathologic Basis of Disease; South Asia edition; India; Elsevier.

SEMESTER: II**Course Title: COMPUTER APPLICATIONS IN PHARMACY****Course Code: BP205T**

L	T	P	Credits
3	0	0	3

Total: 30 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand Database, Database Management system, Computer application in clinical studies and use of databases.
- 2 Practice drug interactions, drug information services and patient counseling.
- 3 Understand that using automated technology can also improve patient care safety by reducing medication errors, maintaining patient's medication records.
- 4 Evaluate abnormal changes in patients faster and with more accuracy
- 5 Design Automated Dispensing Units and Medication Reminder Devices

Course Content:**UNIT – I****06 Hours**

Number system: Binary number system, Decimal number system, Octal number system, Hexadecimal number systems, conversion decimal to binary, binary to decimal, octal to binary etc, binary addition, binary subtraction – One's complement, Two's complement method, binary multiplication, binary division

Concept of Information Systems and Software: Information gathering, requirement and feasibility analysis, data flow diagrams, process specifications, input/output design, process life cycle, planning and managing the project

UNIT –II**06 Hours**

Web technologies: Introduction to HTML, XML, CSS and Programming languages, introduction to web servers and Server Products
Introduction to databases, MYSQL, MS ACCESS, Pharmacy Drug database

UNIT – III**06 Hours**

Application of computers in Pharmacy – Drug information storage and retrieval, Pharmacokinetics, Mathematical model in Drug design, Hospital and Clinical Pharmacy, Electronic Prescribing and discharge (EP) systems, barcode medicine identification and automated dispensing of drugs, mobile technology and adherence monitoring
Diagnostic System, Lab-diagnostic System, Patient Monitoring System, Pharma Information System

UNIT – IV**06 Hours**

Bioinformatics: Introduction, Objective of Bioinformatics, Bioinformatics Databases, Concept of Bioinformatics, Impact of Bioinformatics in Vaccine Discovery

UNIT-V

06 Hours

Computers as data analysis in Preclinical development:

Chromatographic data analysis (CDS), Laboratory Information management System (LIMS) and Text Information Management System (TIMS)

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended books

3. S.C.Rastogi (2007). Bioinformatics (Concept, Skills and Applications) CBS Publishers and Distributors, 4596/1- A, 11 Darya Gani, New Delhi – 110 002(INDIA)

SEMESTER: II

Course Title: ENVIRONMENTAL SCIENCES
Course Code: BP206T

L	T	P	Credits
3	0	0	3

Total: 30 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Generate the awareness about environmental problems in the society
- 2 Develop an attitude of concern for the environment
- 3 Attain harmony with Nature.
- 4 Develop knowledge about natural resources.

Course Content:**Unit-I** **10 Hours**

The Multidisciplinary nature of environmental studies Natural Resources
 Renewable and non-renewable resources:
 Natural resources and associated problems
 a) Forest resources; b) Water resources; c) Mineral resources; d) Food resources; e) Energy resources; f) Land resources: Role of an individual in conservation of natural resources.

Unit-II **10 Hours**

Ecosystems Concept of an ecosystem.
 Structure and function of an ecosystem.
 Introduction, types, characteristic features, structure and function of the ecosystems: Forest ecosystem; Grassland ecosystem; Desert ecosystem; Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

Unit- III **10 Hours**

Environmental Pollution: Air pollution; Water pollution; Soil pollution

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest edition):

1. Y.K. Sing,(2006). Environmental Science, New Age International Pvt,Publishers, Bangalore
2. Agarwal, K.C (2001). Environmental Biology, Nidi Publ. Ltd.Bikaner.
3. Brunner R.C. (1989). Hazardous Waste Incineration, McGraw Hill Inc.480p

SEMESTER: II

Course Title: HUMAN ANATOMY AND PHYSIOLOGY
Course Code: BP207P

L	T	P	Credits
0	0	4	2

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the construction, working, care and handling of instruments, glassware and equipment required for practical
- 2 Apply body fluids and blood knowledge in Hemoglobin detection and measurement of blood pressure.
- 3 Analyze working pattern of different organs of each system.
- 4 Evaluate pulse rate, heart rate, erythrocyte sedimentation rate
- 5 Develop reports of white blood cells and red blood cells count

Course Content

1. To study the integumentary and special senses using specimen, models, etc.
2. To study the nervous system using specimen, models, etc.,
3. To study the endocrine system using specimen, models, etc
4. To demonstrate the general neurological examination
5. To demonstrate the function of olfactory nerve
6. To examine the different types of taste.
7. To demonstrate the visual acuity
8. To demonstrate the reflex activity
9. Recording of body temperature
10. To demonstrate positive and negative feedback mechanism.
11. Determination of tidal volume and vital capacity.
12. Study of digestive, respiratory, cardiovascular systems, urinary and reproductive systems with the help of models, charts and specimens.
13. Recording of basal metabolic index.
14. Study of family planning devices and pregnancy diagnosis test.
15. Demonstration of total blood count by cell analyser
16. Permanent slides of vital organs and gonads.

Recommended Books:

1. K. Sembulingam and P. Sembulingam (2012). Essentials of Medical Physiology, Jaypee Brothers Medical Publishers, New Delhi.
2. Dr. C.C. Chatterjee (2018). Human Physiology. Vol 1, 2, Academic Publishers Kolkata

SEMESTER: II

Course Title: PHARMACEUTICAL ORGANIC CHEMISTRY –I
Course Code: BP208P

L	T	P	Credits
0	0	4	2

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the principle behind various qualitative tests and analyze the given unknown organic compound having different functional groups
- 2 Apply various laboratory techniques for the synthesis of organic compounds, purification of the synthesized compounds using precipitation or recrystallization.
- 3 Analyze organic compounds qualitatively, synthesis of derivatives.
- 4 Evaluate correct use of various equipment & Safety measures in Pharmaceutical Chemistry laboratory.
- 5 Understand creation of polymers, like plastics and nylons

Course Content

I. Systematic qualitative analysis of unknown organic compounds like

1. Preliminary test: Color, odour, aliphatic/aromatic compounds, saturation and unsaturation.
2. Detection of elements like Nitrogen, Sulphur and Halogen by Lassaigne's test
3. Solubility test
4. Functional group test like Phenols, Amides/ Urea, Carbohydrates, Amines, Carboxylic acids, Aldehydes and Ketones, Alcohols, Esters, Aromatic and Halogenated Hydrocarbons, Nitro compounds and Anilides.
5. Melting point/Boiling point of organic compounds
6. Identification of the unknown compound from the literature using melting point/ boiling point.
7. Preparation of the derivatives and confirmation of the unknown compound by melting point/ boiling point.
8. Minimum 5 unknown organic compounds to be analysed systematically.

II. Preparation of suitable solid derivatives from organic compounds

III. Construction of molecular models

Recommended Books (Latest Editions)

1. Morrison and Boyd (2010). Organic Chemistry. Pearson.
2. Furniss S. Brian (2005). Vogel's text book of Practical Organic Chemistry. Pearson

SEMESTER: II

Course Title: BIOCHEMISTRY
Course Code: BP209P

L	T	P	Credits
0	0	4	2

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Develop skill for qualitative analysis of carbohydrates, Proteins, urine analysis, enzymes
- 2 Apply the skills for physiological and pathological condition of chemicals.
- 3 Analyze the interpretation of data emanating from a Clinical Test Lab.
- 4 Evaluate physiological conditions, influence the structures and re-activities of biomolecules
- 5 Construct tests used to detect infections, genetic disorders, and other diseases

Course Content

1. Qualitative analysis of carbohydrates (Glucose, Fructose, Lactose, Maltose, Sucrose and starch)
2. Identification tests for Proteins (albumin and Casein)
3. Quantitative analysis of reducing sugars (DNSA method) and Proteins (Biuret method)
4. Qualitative analysis of urine for abnormal constituents
5. Determination of blood creatinine
6. Determination of blood sugar
7. Determination of serum total cholesterol
8. Preparation of buffer solution and measurement of pH
9. Study of enzymatic hydrolysis of starch
10. Determination of Salivary amylase activity
11. Study the effect of Temperature on Salivary amylase activity.
12. Study the effect of substrate concentration on salivary amylase activity.

Recommended Books (Latest Editions)

1. Lehninger (2021). Principles of Biochemistry. W H Freeman & CO.
2. Robert K. Murray, Daryl K. Granner and Victor W. Rodwell (2020). Harper's Biochemistry. Vitae GenBiotech.

SEMESTER: II

Course Title: COMPUTER APPLICATIONS IN PHARMACY
Course Code: BP210P

L	T	P	Credits
0	0	2	1

Total: 30 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Know the various types of databases
- 2 Generate report and printing the report from patient database
- 3 Design a questionnaire using a word processing package to gather information about a particular disease.
- 4 Retrieve the information of a drug and its adverse effects using online tools
- 5 Create and work with queries in MS Access

Course Content

1. Design a questionnaire using a word processing package to gather information about a particular disease.
2. Create a HTML web page to show personal information.
3. Retrieve the information of a drug and its adverse effects using online tools
4. Creating mailing labels Using Label Wizard , generating label in MSWORD
4. Create a database in MS Access to store the patient information with the required fields using access
5. Design a form in MS Access to view, add, delete and modify the patient record in the database
6. Generating report and printing the report from patient database
7. Creating invoice table using – MSAccess
8. Drug information storage and retrieval using MSAccess
9. Creating and working with queries in MSAccess
10. Exporting Tables, Queries, Forms and Reports to webpages
11. Exporting Tables, Queries, Forms and Reports to XMLpages

Recommended books

1. William E. Fassett Lea and Febiger (1986). Computer Application in Pharmacy, 600 South Washington Square, USA, (215)922-1330.
2. Sean Ekins, Wiley-Interscience(2006). Computer Application in Pharmaceutical Research and Development, A John Willey and Sons, INC., Publication, USA
3. S.C. Rastogi (2007). Bioinformatics (Concept, Skills and Applications), CBS Publishers and Distributors, 4596/1- A, 11 Darya Gani, New Delhi – 110002(INDIA)

SEMESTER: III**Course Title: PHARMACEUTICAL ORGANIC CHEMISTRY-II****Course Code: BP301T**

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand methods of preparation and reactions of organic compounds
- 2 Apply on heterocyclic compounds
- 3 Analyze the Chemistry of fats and oils
- 4 Evaluate reactions, reactivity, mechanisms, and orientation of organic compounds
- 5 Create electrophilic and nucleophilic reactions.

Course Content**Unit I****10 Hours****Benzene and its derivatives**

A. Analytical, synthetic and other evidences in the derivation of structure of benzene, Orbital picture, resonance in benzene, aromatic characters, Huckel's rule

B. Reactions of benzene - nitration, sulphonation, halogenation reactivity, Friedelcrafts alkylation- reactivity, limitations, Friedelcrafts acylation.

C. Substituents, effect of substituents on reactivity and orientation of mono substituted benzene compounds towards electrophilic substitution reaction

D. Structure and uses of DDT, Saccharin, BHC and Chloramine

UNIT II**10 Hours**

Phenols* - Acidity of phenols, effect of substituents on acidity, qualitative tests, Structure and uses of phenol, cresols, resorcinol, naphthols

Aromatic Amines* - Basicity of amines, effect of substituents on basicity, and synthetic uses of aryl diazonium salts

Aromatic Acids* - Acidity, effect of substituents on acidity and important reactions of benzoic acid.

UNIT III**10 Hours****Fats and Oils**

a. Fatty acids - reactions

b. Hydrolysis, Hydrogenation, Saponification and Rancidity of oils, Drying oils.

c. Analytical constants - Acid value, Saponification value, Ester value, Iodine value, Acetyl value, Reichert Meissl (RM) value - significance and principle involved in their determination

UNIT IV**08 Hours****Polynuclear hydrocarbons:**

a. Synthesis, reactions

b. Structure and medicinal uses of Naphthalene, Phenanthrene, Anthracene, Diphenylmethane, Triphenylmethane and their derivatives

UNIT V**07 Hours****Cyclo alkanes***

Stabilities – Baeyer's strain theory, limitation of Baeyer's strain theory, Coulson and Moffitt's modification, Sachse Mohr's theory (Theory of strainless rings), reactions of cyclopropane and cyclobutane only.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Morrison and Boyd (2010). Organic Chemistry. Pearson.
2. Furniss S. Brian (2005). Vogel's text book of Practical Organic Chemistry. Pearson.

SEMESTER: III

Course Title: PHYSICAL PHARMACEUTICS-I
Course Code: BP302T

L	T	P	Credits
3	1	0	4

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the various physicochemical properties of drug molecules in the designing the dosage forms.
- 2 Apply the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations.
- 3 Analyze use of physicochemical properties in the formulation development and evaluation of dosage forms.
- 4 Evaluate the role of surfactants, interfacial phenomenon and thermodynamics.
- 5 Create physicochemical properties of drug molecules in formulation and research development.

Course Content:**UNIT-I****10 Hours**

Solubility of drugs: Solubility expressions, mechanisms of solute solvent interactions, ideal solubility parameters, solvation & association, quantitative approach to the factors influencing solubility of drugs, diffusion principles in biological systems. Solubility of gas in liquids, solubility of liquids in liquids, (Binary solutions, ideal solutions) Raoult's law, real solutions. Partially miscible liquids, Critical solution temperature and applications. Distribution law, its limitations and applications

UNIT-II**10 Hours**

States of Matter and properties of matter: State of matter, changes in the state of matter, latent heats, vapour pressure, sublimation critical point, eutectic mixtures, gases, aerosols – inhalers, relative humidity, liquid complexes, liquid crystals, glassy states, solid crystalline, amorphous & polymorphism.

Physicochemical properties of drug molecules: Refractive index, optical rotation, dielectric constant, dipole moment, dissociation constant, determinations and applications

UNIT-III**08 Hours**

Surface and interfacial phenomenon: Liquid interface, surface & interfacial tensions, surface free energy, measurement of surface & interfacial tensions,

spreading coefficient, adsorption at liquid interfaces, surface active agents, HLB Scale, solubilization, detergency, adsorption at solid interface.

UNIT-IV**08 Hours**

Complexation and protein binding: Introduction, Classification of Complexation, Applications, methods of analysis, protein binding, Complexation and drug action, crystalline structures of complexes and thermodynamic treatment of stability constants.

UNIT-V**07 Hours**

pH, buffers and Isotonic solutions: Sorensen's pH scale, pH determination (electrometric and calorimetric), applications of buffers, buffer equation, buffer capacity, buffers in pharmaceutical and biological systems, buffered isotonic solutions.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books:

1. Cooper and Gunn (2008). Tutorial Pharmacy, S J Carter.

SEMESTER: III

Course Title: PHARMACEUTICAL MICROBIOLOGY
Course Code: BP303T

L	T	P	Credits
3	1	0	4

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Performsterilization in pharmaceutical processing and industry
- 2 Analyze microbiological standardization of Pharmaceuticals
- 3 Evaluate sterility testing of pharmaceutical products
- 4 Develop cell cultures for pharmaceutical industry and research

Course content:**Unit I****10 Hours**

Introduction, history of microbiology, its branches, scope and its importance. Introduction to Prokaryotes and Eukaryotes Study of ultra-structure and morphological classification of bacteria, nutritional requirements, raw materials used for culture media and physical parameters for growth, growth curve, isolation and preservation methods for pure cultures, cultivation of anaerobes, quantitative measurement of bacterial growth (total & viable count). Study of different types of phasecontrast microscopy, dark field microscopy and electron microscopy.

Unit II**10 Hours**

Identification of bacteria using staining techniques (simple, Gram's & Acid-fast staining) and biochemical tests (IMViC). Study of principle, procedure, merits, demerits and applications of physical, chemical gaseous, radiation and mechanical method of sterilization. Evaluation of the efficiency of sterilization methods.

Equipment employed in large scale sterilization. Sterility indicators.

Unit III**10 Hours**

Study of morphology, classification, reproduction/replication and cultivation of Fungi and Viruses. Classification and mode of action of disinfectants Factors influencing disinfection, antiseptics and their evaluation. For bacteriostatic and bactericidal actions. Evaluation of bactericidal & Bacteriostatic. Sterility testing of products (solids, liquids, ophthalmic and other sterile products) according to IP, BP and USP.

Unit IV**08 Hours**

Designing of aseptic area, laminar flow equipment's; study of different sources of contamination in an aseptic area and methods of prevention, clean area classification. Principles and methods of different microbiological assay. Methods for standardization of antibiotics, vitamins and amino acids. Assessment of a new antibiotic.

Unit V

07 Hours

Types of spoilage, factors affecting the microbial spoilage of pharmaceutical products, sources and types of microbial contaminants, assessment of microbial contamination and spoilage. Preservation of pharmaceutical products using antimicrobial agents, evaluation of microbial stability of formulations.

Growth of animal cells in culture, general procedure for cell culture, Primary, established and transformed cell cultures.

Application of cell cultures in pharmaceutical industry and research.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest edition)

1. W.B. Hugo and A.D. Russel (2013). Pharmaceutical Microbiology, Blackwell Scientific publications, Oxford London.
2. Prescott and Dunn (2002). Industrial Microbiology, CBS Publishers & Distributors, Delhi.

SEMESTER: III

Course Title: PHARMACEUTICAL ENGINEERING
Course Code: BP304T

L	T	P	Credits
3	1	0	4

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand various unit operations used in Pharmaceutical industry.
- 2 Apply various processes involved in pharmaceutical manufacturing.
- 3 Analyse various tests to prevent environmental pollution.
- 4 Evaluate appreciate and comprehend significance of plant layout design for optimum use of resources
- 5 Create the various preventive methods used for corrosion control in pharmaceutical industry

Course Content:**UNIT-I****10 Hours**

Flow of fluids: Types of manometers, Reynolds number and its significance, Bernoulli's theorem and its applications, Energy losses, Orifice meter, Venturimeter, Pitot tube and Rotometer

Size Reduction: Objectives, Mechanisms & Laws governing size reduction, factors affecting size reduction, principles, construction, working, uses, merits and demerits of Hammer mill, ball mill, fluid energy mill, Edge runner mill & end runner mill.

Size Separation: Objectives, applications & mechanism of size separation, official standards of powders, sieves, size separation Principles, construction, working, uses, merits and demerits of Sieve shaker, cyclone separator, Air separator, Bag filter & elutriation tank

UNIT-II**10 Hours**

Heat Transfer: Objectives, applications & Heat transfer mechanisms. Fourier's law, Heat transfer by conduction, convection & radiation. Heat interchangers & heat exchangers.

Evaporation: Objectives, applications and factors influencing evaporation, differences between evaporation and other heat process. principles, construction, working, uses, merits and demerits of Steam jacketed kettle, horizontal tube evaporator, climbing film evaporator, forced circulation evaporator, multiple effect evaporator & Economy of multiple effect evaporator.

Distillation: Basic Principles and methodology of simple distillation, flash distillation, fractional distillation, distillation under reduced pressure, steam distillation & molecular distillation

UNIT-III**08 Hours**

Drying: Objectives, applications & mechanism of drying process, measurements & applications of Equilibrium Moisture content, rate of drying curve. principles, construction, working, uses, merits and demerits of Tray dryer, drum dryer spray dryer, fluidized bed dryer, vacuum dryer, freeze dryer.

Mixing: Objectives, applications & factors affecting mixing, Difference between solid and liquid mixing, mechanism of solid mixing, liquids mixing and semisolids mixing. Principles, Construction, Working, uses, Merits and Demerits of Double cone blender, twin shell blender, ribbon blender, Sigma blade mixer, planetary mixers, Propellers, Turbines, Paddles & Silverson Emulsifier,

UNIT-IV**08 Hours**

Filtration: Objectives, applications, Theories & Factors influencing filtration, filter aids, filter Medias. Principle, Construction, Working, Uses, Merits and demerits of plate & frame filter, filter leaf, rotary drum filter, Meta filter & Cartridge filter, membrane filters and Seidtz filter.

Centrifugation: Objectives, principle & applications of Centrifugation, principles, construction, working, uses, merits and demerits of perforated basket centrifuge, Non- perforated basket centrifuge, semi continuous centrifuge & super centrifuge.

UNIT- V**07 Hours****Materials of pharmaceutical plant construction, Corrosion and its Prevention:**

Factors affecting during materials selected for Pharmaceutical plant construction, Theories of corrosion, types of corrosion and their prevention. Ferrous and nonferrous metals, inorganic and organic non-metals, basic of material handling systems.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books:

1. Martin, (2005). Remington Practice of Pharmacy.
2. Lachmann (2018). Theory and Practice of Industrial Pharmacy.

SEMESTER: III

Course Title: PHARMACEUTICAL ORGANIC CHEMISTRY-II
Course Code: BP305P

L	T	P	Credits
0	0	4	2

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the laboratory techniques for Recrystallization, and Steam distillation.
- 2 Determine oil values.
- 3 Analyze and prepare compounds
- 4 Evaluate the reactivity of organic compounds
- 5 Create steam distillation techniques

Course Content**I Experiments involving**

laboratory techniques
 Recrystallization
 Steam distillation

II Determination of following oil values (including

standardization of reagents) Acid value
 Saponification
 Iodine value

III Preparation of compounds

Benzanilide/Phenyl benzoate/Acetanilide from Aniline/ Phenol/Aniline by acylation reaction. 2, 4, 6-Tribromo aniline/Para bromo acetanilide from Aniline/Acetanilide by halogenation (Bromination) reaction.
 5-Nitro salicylic acid/Meta di nitro benzene from Salicylic acid /Nitro benzene by nitration reaction.
 Benzoic acid from Benzyl chloride by oxidation reaction.
 Benzoic acid/ Salicylic acid from alkyl benzoate/ alkyl salicylate by hydrolysis reaction. 1-Phenyl azo-2-naphthol from Aniline by diazotization and coupling reactions.
 Benzil from Benzoin by oxidation reaction.
 Dibenzal acetone from Benzaldehyde by Claisen Schmidt reaction
 Cinnamic acid from Benzaldehyde by Perkin reaction
P-Iodo benzoic acid from *P*-amino benzoic acid

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Morrison and Boyd (2010). Organic Chemistry. Pearson.
2. Furniss S. Brian (2005). Vogel's Text book of Practical Organic Chemistry. Pearson

SEMESTER: III

Course Title: PHYSICAL PHARMACEUTICS-I
Course Code: BP306P

L	T	P	Credits
0	0	4	2

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the determination of solubility of drug, pKa value, Partition co-efficient, % composition, surface tension, HLB number, Freundlich and Langmuir constants, critical micellar concentration, stability constant and donor acceptor ratio
- 2 Demonstrate use of physicochemical properties in the formulation development and evaluation of dosage forms.
- 3 Analyze the determination of expiry date of formulations.
- 4 Evaluate the chemical stability tests of various drug products.
- 5 Create the pH titration method.

Course Content

1. Determination the solubility of drug at roomtemperature
2. Determination of pKa value by Half Neutralization/ Henderson Hasselbalchequation.
3. Determination of Partition co- efficient of benzoic acid in benzene andwater
4. Determination of Partition co- efficient of Iodine in CCl₄ andwater
5. Determination of % composition of NaCl in a solution using phenol-water system by CST method
6. Determination of surface tension of given liquids by drop count and drop weightmethod
7. Determination of HLB number of a surfactant by saponificationmethod
8. Determination of Freundlich and Langmuir constants using activated charcoal
9. Determination of critical micellar concentration of surfactants
10. Determination of stability constant and donor acceptor ratio of PABA-Caffeinecomplex by solubilitymethod
11. Determination of stability constant and donor acceptor ratio of Cupric-Glycinecomplex by pH titrationmethod

Recommended Books: (Latest Editions)

1. Cooper and Gunn (2008). Tutorial Pharmacy, S J Carte

SEMESTER: III

Course Title: PHARMACEUTICAL MICROBIOLOGY
Course Code: BP307P

L	T	P	Credits
0	0	4	2

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand Introduction and study of different equipment and processing.
- 2 Apply importance of microbial limit tests, preservative efficacy test & standardization processes
- 3 Analyze sterilization status of glassware, culture media
- 4 Evaluate various structural features, biology & characteristics of microbes
- 5 Develop new antibiotics and pure cultures of microorganisms for vaccine production

Course Content

1. Introduction and study of different equipment and processing, e.g., B.O.D. incubator, laminar flow, aseptic hood, autoclave, hot air sterilizer, deep freezer, refrigerator, microscopes used in experimental microbiology.
2. Sterilization of glassware, preparation and sterilization of media.
3. Sub culturing of bacteria and fungus. Nutrient stabs and slants preparations.
4. Staining methods- Simple, Grams staining and acid-fast staining (Demonstration with practical).
5. Isolation of pure culture of micro-organisms by multiple streak plate technique and other techniques.
6. Microbiological assay of antibiotics by cup plate method and other methods
7. Motility determination by hanging drop method.
8. Sterility testing of pharmaceuticals.
9. Bacteriological analysis of water
10. Biochemical test.

Recommended Books (Latest edition)

1. W.B. Hugo and A.D. Russel (2013). Pharmaceutical Microbiology, Blackwell Scientific publications, Oxford London.
2. Prescott and Dunn (2002). Industrial Microbiology, CBS Publishers & Distributors, Delhi.

SEMESTER: III

Course Title: PHARMACEUTICAL ENGINEERING
Course Code: BP308P

L	T	P	Credits
0	0	4	2

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the determination of radiation constant, overall heat transfer coefficient, moisture content and loss on drying, humidity of air.
- 2 Apply Construction working and application of Pharmaceutical Machinery
- 3 Analyze Size analysis by sieving.
- 4 Evaluate size reduction using ball mill and determining Kicks, Rittinger's, Bond's coefficients, power requirement and critical speed of Ball Mill.
- 5 Create steam distillation

COURSE CONTENT

- I. Determination of radiation constant of brass, iron, unpainted and painted glass.
- II. Steam distillation – To calculate the efficiency of steam distillation.
- III. To determine the overall heat transfer coefficient by heat exchanger.
- IV. Construction of drying curves (for calcium carbonate and starch).
- V. Determination of moisture content and loss on drying.
- VI. Determination of humidity of air – i) from wet and dry bulb temperatures – use of Dew point method.
- VII. Description of Construction working and application of Pharmaceutical Machinery such as rotary tablet machine, fluidized bed coater, fluid energy mill, dehumidifier.
- VIII. Size analysis by sieving – To evaluate size distribution of tablet granulations – Construction of various size frequency curves including arithmetic and logarithmic probability plots.
- IX. Size reduction: To verify the laws of size reduction using ball mill and determining Kicks, Rittinger's, Bond's coefficients, power requirement and critical speed of Ball Mill.
- X. Demonstration of colloid mill, planetary mixer, fluidized bed dryer, freeze dryer and such other major equipment.
- XI. Factors affecting Rate of Filtration and Evaporation (Surface area, Concentration and Thickness/viscosity)
- XII. To study the effect of time on the Rate of Crystallization.
- XIII. To calculate the uniformity Index for given sample by using Double Cone Blender.

Recommended Books:

1. Martin, (2005). Remington practice of pharmacy.
2. Lachmann (2018). Theory and practice of industrial pharmacy

SEMESTER: IV**Course Title: PHARMACEUTICAL ORGANIC CHEMISTRY -III****Course Code: BP401T**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand anatomical terminology to identify and describe locations of major organs of human body systems.
- 2 Analyze the advanced concepts of cardiovascular physiology.
- 3 Identify the major components of the lymphatic system and describe their functions.
- 4 Evaluate coordinated working pattern of different organs of each system.
- 5 Develop isomers

COURSE CONTENT

Note: To emphasize on definition, types, mechanisms, examples, uses/applications

UNIT-I**10 Hours**

Optical isomerism –
Optical activity, enantiomerism, diastereoisomerism, meso compounds Elements of symmetry, chiral and achiral molecules DL system of nomenclature of optical isomers, sequence rules, RS system of nomenclature of optical isomers
Reactions of chiral molecules
Racemic modification and resolution of racemic mixture. Asymmetric synthesis: partial and absolute

UNIT-II**10 Hours**

Geometrical isomerism
Nomenclature of geometrical isomers (Cis Trans, EZ, Syn Anti systems) Methods of determination of configuration of geometrical isomers.
Conformational isomerism in Ethane, n-Butane and Cyclohexane.
Stereo isomerism in biphenyl compounds (Atropisomerism) and conditions for optical activity.
Stereospecific and stereoselective reaction

UNIT-III**10 Hours****Heterocyclic compounds:**

Nomenclature and classification
Synthesis, reactions and medicinal uses of following compounds/derivatives Pyrrole, Furan, and Thiophene
Relative aromaticity and reactivity of Pyrrole, Furan and Thiophene

UNIT-IV**08 Hours**

Synthesis, reactions and medicinal uses of following compounds/derivatives, Pyrazole, Imidazole, Oxazole and Thiazole. Pyridine, Quinoline, Isoquinoline, Acridine and Indole. Basicity of pyridine Synthesis and medicinal uses of Pyrimidine, Purine, azepines and their derivatives

UNIT-V**07 Hours****Reactions of synthetic importance**

Metal hydride reduction (NaBH_4 and LiAlH_4), Clemmensen reduction, Birch reduction, Wolff Kishner reduction. Oppenauer-oxidation and Dakin reaction. Beckmann's rearrangement and Schmidt rearrangement. Claisen-Schmidt condensation

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Morrison and Boyd (2010). Organic Chemistry. Pearson.
2. Furniss S. Brian (2005). Vogel's text book of Practical Organic Chemistry. Pearson

SEMESTER: IV

Course Title: MEDICINAL CHEMISTRY-I
Course Code: BP402T

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Correlate between pharmacology of a disease and its mitigation or cure.
- 2 Analyze the structural activity relationship of different class of drugs.
- 3 Compose the chemical synthesis of some drugs.
- 4 Evaluate the Structural Activity Relationship (SAR) of different class of drugs.
- 5 Develop advancements in the Structural Activity Relationship (SAR) of different class of drugs.

Course Content:**UNIT- I****10 Hours****Introduction to Medicinal Chemistry****History and development of medicinal chemistry physicochemical properties in relation to biological action**

Ionization, Solubility, Partition Coefficient, Hydrogen bonding, Protein binding, Chelation, Bioisosterism, Optical and Geometrical isomerism.

Drug metabolism

Drug metabolism principles- Phase I and Phase II.

Factors affecting drug metabolism including stereo chemical aspects

UNIT- II**10 Hours****Drugs acting on Autonomic Nervous****System Adrenergic****Neurotransmitters:**

Biosynthesis and catabolism of catecholamine.

Adrenergic receptors (Alpha & Beta) and their distribution.

Sympathomimetic agents: SAR of Sympathomimetic agents

Direct acting: Nor-epinephrine, Epinephrine, Phenylephrine*, Dopamine, Methyldopa, Clonidine, Dobutamine, Isoproterenol, Terbutaline, Salbutamol*, Bitolterol, Naphazoline, Oxymetazoline and Xylometazoline.

Indirect acting agents: Hydroxyamphetamine, Pseudoephedrine,

Propylhexedrine. Agents with mixed mechanism: Ephedrine,

Metaraminol.

Adrenergic Antagonists:

Alpha adrenergic blockers: Tolazoline*, Phentolamine, Phenoxybenzamine, Prazosin, Dihydroergotamine, Methysergide.

Beta adrenergic blockers: SAR of beta blockers, Propranolol*, Metibranolol, Atenolol, Betazolol, Bisoprolol, Esmolol, Metoprolol, Labetolol, Carvedilol.

UNIT-III**10 Hours****Cholinergic neurotransmitters:**

Biosynthesis and catabolism of acetylcholine.

Cholinergic receptors (Muscarinic & Nicotinic) and their distribution.

Parasympathomimetic agents: SAR of Parasympathomimetic agents

Direct acting agents: Acetylcholine, Carbachol*, Bethanechol, Methacholine, Pilocarpine

Indirect acting/ Cholinesterase inhibitors (Reversible & Irreversible):

Physostigmine, Neostigmine*, Pyridostigmine, Edrophonium chloride, Tacrine hydrochloride, Ambenonium chloride, Isoflurophate, Echothiophateiodide, Parathione, Malathion.

Cholinesterase reactivator: Pralidoxime chloride.

Cholinergic Blocking agents: SAR of cholinolytic agents

Solanaceous alkaloids and analogues: Atropine sulphate, Hyoscyaminesulphate, Scopolamine hydrobromide, Homatropine hydrobromide, Ipratropium bromide*.

Synthetic cholinergic blocking agents: Tropicamide, Cyclopentolate hydrochloride, Clidinium bromide, Dicyclomine hydrochloride*, Glycopyrrolate, Methantheline bromide, Propantheline bromide, Benztropine mesylate, Orphenadrine citrate, Biperidine hydrochloride, Procyclidine hydrochloride*, Tridihexethyl chloride, Isopropamide iodide, Ethopropazine hydrochloride.

UNIT- IV

08 Hours

Drugs acting on Central Nervous System

A. Sedatives andHypnotics:

Benzodiazepines: SAR of Benzodiazepines, Chlordiazepoxide, Diazepam*, Oxazepam, Chlorazepate, Lorazepam, Alprazolam, Zolpidem

Barbiturtes: SAR of barbiturates, Barbitol*, Phenobarbital, Mephobarbital, Amobarbital, Butabarbital, Pentobarbital, Secobarbital

Miscellaneous:

Amides & imides: Glutethmide

Alcohol & their carbamate derivatives: Meprobomate,

Ethchlorvynol. Aldehyde & their derivatives: Triclofos sodium, Paraldehyde.

B. Antipsychotics

Phenothiazines: SAR of Phenothiazines - Promazine hydrochloride, Chlorpromazine hydrochloride*, Triflupromazine, Thioridazinehydrochloride, Piperacetazine hydrochloride, Prochlorperazine maleate, Trifluoperazine hydrochloride.

Ring Analogues of Phenothiazines: Chlorprothixene, Thiothixene, Loxapine succinate, Clozapine.

Fluro buterphenones: Haloperidol, Droperidol, Risperidone.

Beta amino ketones: Molindone hydrochloride.

Benzamides: Sulpieride.

C. Anticonvulsants: SAR of Anticonvulsants, mechanism of anticonvulsantAction

Barbiturates: Phenobarbitone, Methabarbitol.

Hydantoins: Phenytoin*, Mephenytoin, Ethotoin

Oxazolidine diones: Trimethadione,

Paramethadione

Succinimides Phensuximide, Methsuximide, and

Ethosuximide*

Urea and monoacylureas: Phenacemide,
Carbamazepine* **Benzodiazepines:** Clonazepam

Miscellaneous: Primidone, Valproic acid, Gabapentin, Felbamate

UNIT – V

07 Hours

Drugs acting on Central Nervous System

General anesthetics:

Inhalation anesthetics: Halothane*, Methoxyflurane, Enflurane, Sevoflurane, Isoflurane, Desflurane.

Ultra short acting barbiturates: Methohexital sodium*, Thiamylalsodium, Thiopental sodium.

Dissociative anesthetics: Ketamine hydrochloride

Narcotic and non-narcotic analgesics

Morphine and related drugs: SAR of Morphine analogues, Morphine sulphate, Codeine, Meperidine hydrochloride, Anilerdine hydrochloride, Diphenoxylate hydrochloride, Loperamide hydrochloride, Fentanyl citrate*, Methadone hydrochloride*, Propoxyphene hydrochloride, Pentazocine, Levorphanoltartarate.

Narcotic antagonists: Nalorphine hydrochloride, Levallorphan tartarate, Naloxone hydrochloride.

Anti-inflammatory agents: Sodium salicylate, Aspirin, Mefenamic acid*, Meclofenamate, Indomethacin, Sulindac, Tolmetin, Zomepirac, Diclofenac, Ketorolac, Ibuprofen*, Naproxen, Piroxicam, Phenacetin, Acetaminophen, Antipyrine, Phenylbutazone.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books

1. Foye's Principles of Medicinal Chemistry (2019). WoltersKluwer.
2. Burger's Medicinal Chemistry, Vol I to IV.
3. Remington's Pharmaceutical Sciences (2008).

SEMESTER: IV

Course Title: PHYSICAL PHARMACEUTICS-II
Course Code: BP403T

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the physicochemical properties of drug molecules, pH, and solubility.
- 2 Determine use of physicochemical properties in the formulation development and evaluation of dosage forms.
- 3 Differentiate disperse system in different pharmaceutical preparation.
- 4 Evaluate half-life.
- 5 Formulate pure drug substance into a dosage form

Course Content:**UNIT-I****07 Hours**

Colloidal dispersions: Classification of dispersed systems & their general characteristics, size & shapes of colloidal particles, classification of colloids & comparative account of their general properties. Optical, kinetic & electrical properties. Effect of electrolytes, coacervation, peptization & protective action.

UNIT-II**10 Hours**

Rheology: Newtonian systems, law of flow, kinematic viscosity, effect of temperature, non-Newtonian systems, pseudoplastic, dilatant, plastic, thixotropy, thixotropy in formulation, determination of viscosity, capillary, falling Sphere, rotational viscometers

Deformation of solids: Plastic and elastic deformation, Heckel equation, Stress, Strain, Elastic Modulus

UNIT-III**10 Hours**

Coarse dispersion: Suspension, interfacial properties of suspended particles, settling suspensions, formulation of flocculated and deflocculated suspensions. Emulsions and theories of emulsification, microemulsion and multiple emulsions; Stability of emulsions, preservation of emulsions, rheological properties of emulsions and emulsion formulation by HLB method.

UNIT-IV**10 Hours**

Micromeritics: Particle size and distribution, mean particle size, number and weight distribution, particle number, methods for determining particle size by different methods, counting and separation method, particle shape, specific surface, methods for determining surface area, permeability, adsorption, derived properties of powders, porosity, packing arrangement, densities, bulkiness & flow properties.

UNIT-V**10 Hours**

Drug stability: Reaction kinetics: zero, pseudo-zero, first & second order, units of basic rate constants, determination of reaction order. Physical and

chemical factors influencing the chemical degradation of pharmaceutical product: temperature, solvent, ionic strength, dielectric constant, specific & general acid base catalysis, Simple numerical problems. Stabilization of medicinal agents against common reactions like hydrolysis & oxidation. Accelerated stability testing in expiration dating of pharmaceutical dosage forms. Photolytic degradation and its prevention

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. Cooper and Gunn (2008). Tutorial Pharmacy, S J Carter.

SEMESTER: IV

Course Title: PHARMACOLOGY-I
Course Code: BP404T

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the application of basic pharmacological knowledge in the prevention and treatment of various diseases.
- 2 Analyze the signal transduction mechanism of various receptors.
- 3 Explain the mechanism of drug action at organ system/sub cellular/macromolecular levels.
- 4 Apply the basic pharmacological knowledge in the prevention and treatment of various diseases.
- 5 Modify mechanism of action of different drugs

Course Content:**UNIT-I****08 Hours****1. General Pharmacology**

a. Introduction to Pharmacology- Definition, historical landmarks and scope of pharmacology, nature and source of drugs, essential drugs concept and routes of drug administration, Agonists, antagonists (competitive and non-competitive), spare receptors, addiction, tolerance, dependence, tachyphylaxis, idiosyncrasy, allergy.

b. Pharmacokinetics- Membrane transport, absorption, distribution, metabolism and excretion of drugs. Enzyme induction, enzyme inhibition, kinetics of elimination

UNIT-II**12 Hours****General Pharmacology**

a. Pharmacodynamics- Principles and mechanisms of drug action. Receptor theories and classification of receptors, regulation of receptors. drug receptors interaction signal transduction mechanisms, G-protein-coupled receptors, ion channel receptor, transmembrane enzyme linked receptors, transmembrane JAK-STAT binding receptor and receptors that regulate transcription factors, dose response relationship, therapeutic index, combined effects of drugs and factors modifying drug action.

b. Adverse drug reactions.

c. Drug interactions (pharmacokinetic and pharmacodynamic) d. Drug discovery and clinical evaluation of new drugs - Drug discovery phase, preclinical evaluation phase, clinical trial phase, phases of clinical trials and pharmacovigilance.

UNIT-III**10 Hours****2. Pharmacology of drugs acting on peripheral nervous system**

a. Organization and function of ANS.

b. Neurohumoral transmission, co-transmission and classification of neurotransmitters.

c. Parasympathomimetics, Parasympatholytics, Sympathomimetics, sympatholytics.

d. Neuromuscular blocking agents and skeletal muscle relaxants (peripheral).

- e. Local anesthetic agents.
- f. Drugs used in myasthenia gravis and glaucoma

UNIT-IV**08 Hours****3. Pharmacology of drugs acting on central nervous system**

- a. Neurohumoral transmission in the C.N.S. special emphasis on importance of various neurotransmitters like with GABA, Glutamate, Glycine, serotonin, dopamine.
- b. General anesthetics and pre-anesthetics.
- c. Sedatives, hypnotics and centrally acting muscle relaxants.
- d. Anti-epileptics
- e. Alcohols and disulfiram

UNIT-V**07 Hours****3. Pharmacology of drugs acting on central nervous system**

- a. Psychopharmacological agents: Antipsychotics, antidepressants, anti-anxiety agents, anti-manics and hallucinogens.
- b. Drugs used in Parkinson's disease and Alzheimer's disease.
- c. CNS stimulants and nootropics.
- d. Opioid analgesics and antagonists
- e. Drug addiction, drug abuse, tolerance and dependence.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Rang H. P., Dale M. M., Ritter J. M., Flower R. J (2019). Rang and Dale's Pharmacology, Churchill Livingstone Elsevier Goodman and Gilman's (2017).
2. The Pharmacological Basis of Therapeutics.

SEMESTER: IV

**Course Title: PHARMACOGNOSY AND
PHYTOCHEMISTRY I
Course Code: BP405T**

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the recognition of medicinal plants, identification of adulteration and Contamination.
- 2 Analysis of organoleptic microscopic properties of herbal drugs
- 3 Apply chemical constituents of drug in commercial pharmaceutical aids
- 4 Understand evaluation techniques for the herbal drugs.
- 5 Develop plant tissue cultures

Course Content:**UNIT-I****08 Hours****Introduction to Pharmacognosy:**

- (a) Definition, history, scope and development of Pharmacognosy
- (b) Sources of Drugs – Plants, Animals, Marine & Tissueculture
- (c) Organized drugs, unorganized drugs (dried latex, dried juices, dried extracts, gums and mucilages, oleoresins and oleo- gum-resins).

Classification of drugs:

Alphabetical, morphological, taxonomical, chemical, pharmacological, chemo and sero taxonomical classification of drugs

Quality control of Drugs of Natural Origin:

Adulteration of drugs of natural origin. Evaluation by organoleptic, microscopic, physical, chemical and biological methods and properties. Quantitative microscopy of crude drugs including lycopodium spore method, leaf constants, camera lucida and diagrams of microscopic objects to scale with camera lucida.

UNIT-II**10 Hours****Cultivation, Collection, Processing and storage of drugs of natural origin:**

Cultivation and Collection of drugs of natural origin Factors influencing cultivation of medicinal plants. Plant hormones and their applications.

Polyploidy, mutation and hybridization with reference to medicinal plants

Conservation of medicinal plants**UNIT-III****07 Hours****Plant tissue culture:**

Historical development of plant tissue culture, types of cultures, Nutritional requirements, growth and their maintenance.

Applications of plant tissue culture in pharmacognosy. Edible vaccines

UNIT IV**10 Hours****Pharmacognosy in various systems of medicine:**

Role of Pharmacognosy in allopathy and traditional systems of medicine namely, Ayurveda, Unani, Siddha, Homeopathy and Chinese systems of medicine.

Introduction to secondary metabolites:

Definition, classification, properties and test for identification of Alkaloids, Glycosides, Flavonoids, Tannins, Volatile oil and Resins

UNIT V**08 Hours**

Study of biological source, chemical nature and uses of drugs of natural origin containing following drugs

Plant Products:

Fibers - Cotton, Jute, Hemp
Hallucinogens, Teratogens, Natural allergens

Primary metabolites:

General introduction, detailed study with respect to chemistry, sources, preparation, evaluation, preservation, storage, therapeutic used and commercial utility as Pharmaceutical Aids and/or Medicines for the following Primarymetabolites:

Carbohydrates: Acacia, Agar, Tragacanth, Honey

Proteins and Enzymes: Gelatin, casein, proteolytic enzymes (Papain, bromelain, serratiopeptidase, urokinase, streptokinase, pepsin).

Lipids (Waxes, fats, fixed oils): Castor oil, Chaulmoogra oil, Wool Fat, Bees Wax

Marine Drugs: Novel medicinal agents from marine sources

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. W.C.Evans (2009). Trease and Evans Pharmacognosy, 16th edition, W.B. Saunders &Co., London.
2. Tyler, V.E., Brady, L.R. and Robbers (1988) J.E., Pharmacognosy, Lea andFebiger, Philadelphia.
3. C.K. Kokate, Purohit, Gokhale (2007), Text book of Pharmacognosy. NiraliPrakashan, New Delhi.
4. R.D. Choudhary (1996) Herbal drug industry, Eastern Publisher, New Delhi.
5. Dr.SH.Ansari, IInd edition (2007). Essentials of Pharmacognosy, Birla publications, New Delhi.

SEMESTER: IV

Course Title: MEDICINAL CHEMISTRY – I
Course Code: BP406P

L	T	P	Credits
0	0	4	2

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Get well acquainted with the synthesis of some important classes of drugs.
- 2 Analyze the chemistry of drugs with respect to their pharmacological activity.
- 3 Evaluate the synthesis of some important classes of drugs.
- 4 Examine mechanism pathways of different classes of medicinal Compounds
- 5 Develop skills involved in thin layer chromatography techniques and purification of synthesized compounds by column chromatography

Course Content**I Content analysis**

- 1 1,3-pyrazole
- 2 1,3-oxazole
- 3 Benzimidazole
- 4 Benzotriazole
- 5 2, 3- diphenylquinoxaline
- 6 Benzocaine
- 7 Phenytoin
- 8 Phenothiazine
- 9 Barbiturate

II Assay of drugs

- 1 Chlorpromazine
- 2 Phenobarbitone
- 3 Atropine
- 4 Ibuprofen
- 5 Aspirin
- 6 Furosemide

III Determination of Partition coefficient for any twodrugs RecommendedBooks

1. Foye's Principles of Medicinal Chemistry (2019). WoltersKluwer.
2. Burger's Medicinal Chemistry, Vol I toIV.
3. Remington's Pharmaceutical Sciences (2008).
4. Indian Pharmacopoeia (2018).

SEMESTER: IV

Course Title: PHYSICAL PHARMACEUTICS-II
Course Code: BP407P

L	T	P	Credits
0	0	4	2

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the principles of chemical kinetics & to use them for stability testing and determination of expiry date of formulations.
- 2 Analyze the pharmaceutical applications of various physical.
- 3 Examine the chemical stability tests of various drug products
- 4 Evaluate rheological parameters of pharmaceutical suspensions and colloids
- 5 Develop new techniques for the evaluation of parameters of dosage forms

Course Content

1. Determination of particle size, particle size distribution using sieving method
2. Determination of particle size, particle size distribution using Microscopic method
3. Determination of bulk density, true density and porosity
4. Determine the angle of repose and influence of lubricant on angle of repose
5. Determination of viscosity of liquid using Ostwald's viscometer
6. Determination sedimentation volume with effect of different suspending agent
7. Determination sedimentation volume with effect of different concentration of single suspending agent
8. Determination of viscosity of semisolid by using Brookfield viscometer
9. Determination of reaction rate constant first order.
10. Determination of reaction rate constant second order
11. Accelerated stability studies

Recommended Books: (Latest Editions)

1. Cooper and Gunn (2008). Tutorial Pharmacy, S J Carter.

SEMESTER: IV

Course Title: PHARMACOLOGY-I
Course Code: BP408P

L	T	P	Credits
0	0	4	2

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand what drugs do to the living organisms and how their effects can be applied to therapeutics
- 2 Analyze correlation of pharmacology with other bio medical sciences.
- 3 Apply laboratory techniques for animal studies
- 4 Observe the effect of drugs on animals by simulated experiments
- 5 Invent laboratory techniques for animal studies

Course Content

1. Introduction to experimental pharmacology.
2. Commonly used instruments in experimental pharmacology.
3. Study of common laboratory animals.
4. Maintenance of laboratory animals as per CPCSEA guidelines.
5. Common laboratory techniques. Blood withdrawal, serum and plasma separation, anesthetics and euthanasia used for animal studies.
6. Study of different routes of drugs administration in mice/rats.
7. Study of effect of hepatic microsomal enzyme inducers on the phenobarbitone sleeping time in mice.
8. Effect of drugs on ciliary motility of frog esophagus
9. Effect of drugs on rabbit eye.
10. Effects of skeletal muscle relaxants using rota-rod apparatus.
11. Effect of drugs on locomotor activity using actophotometer.
12. Anticonvulsant effect of drugs by MES and PTZ method.
13. Study of stereotype and anti-catatonic activity of drugs on rats/mice.
14. Study of anxiolytic activity of drugs using rats/mice.
15. Study of local anesthetics by different methods

Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos

Recommended Books (Latest Editions)

1. Rang H. P., Dale M. M., Ritter J. M., Flower R. J (2019).
2. Rang and Dale's Pharmacology, Churchill Livingstone Elsevier
3. Goodman and Gilman's (2017). The Pharmacological Basis of Therapeutics

SEMESTER: IV

**Course Title: PHARMACOGNOSY AND
PHYTOCHEMISTRY I
Course Code: BP409P**

L	T	P	Credits
0	0	4	2

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand Phytotherapy and the Elderly, Phytotherapy and Children, Understanding Herbal Action.
- 2 Analyze the Material Medicine.
- 3 Conduct extractions/isolations & explain significance of use of various chemicals & physical conditions.
- 4 Identify unorganized crude drugs using morphological, chemical, physical & microscopical characteristics.
- 5 Develop plant tissue cultures

Course Content

1. Analysis of crude drugs by chemical tests: (i)Tragacanth (ii) Acacia (iii)Agar (iv)Gelatin (v) Starch (vi) Honey (vii) Castor oil
2. Determination of stomatal number and index
3. Determination of vein islet number, vein islet termination and palisideratio.
4. Determination of size of starch grains, calcium oxalate crystals by eye piecemicrometer
5. Determination of Fiber length and width
6. Determination of number of starch grains by Lycopodium spore method
7. Determination of Ash value
8. Determination of Extractive values of crude drugs
9. Determination of moisture content of crude drugs
10. Determination of swelling index and foaming

Recommended Books: (Latest Editions)

1. W.C.Evans (2009). Trease and Evans Pharmacognosy, 16th edition, W.B. Saunders & Co., London.
2. Tyler, V.E., Brady, L.R. and Robbers (1988) J.E., Pharmacognosy, Lea and Febiger, Philadelphia.
3. C.K. Kokate, Purohit, Gokhlae (2007), Text book of Pharmacognosy. NiraliPrakashan, New Delhi.
4. R.D. Choudhary (1996) Herbal drug industry, Eastern Publisher, New Delhi.
5. Dr.SH.Ansari, IInd edition (2007). Essentials of Pharmacognosy, Birla publications, New Delhi.

SEMESTER: V**Course Title: Medicinal Chemistry****Course Code: BP501T**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the chemical synthesis of drugs.
- 2 Apply on drug metabolic pathway, adverse effect and therapeutic value of drugs
- 3 Analyze structural activity relationship of different class of drugs.
- 4 Evaluate and acquire knowledge about the chemotherapy for cancer.
- 5 Create drug metabolic pathways

Course Content

Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted(*)

UNIT- I**10 Hours**

Antihistaminic agents: Histamine, receptors and their distribution in the humanbody

H1-antagonists: Diphenhydramine hydrochloride*, Dimenhydrinate, Doxylamines succinate, Clemastine fumarate, Diphenylpyraline hydrochloride, Tripelenamine hydrochloride, Chlorcyclizine hydrochloride, Meclizine hydrochloride, Buclizine hydrochloride, Chlorpheniramine maleate, Triprolidine hydrochloride*, Phenidaminetartarate, Promethazine hydrochloride*, Trimeprazine tartrate, Cyproheptadine hydrochloride, Azatidinemaleate, Astemizole, Loratadine, Cetirizine, Levocetrazine Cromolyn sodium

H2-antagonists: Cimetidine*, Famotidine, Ranitidin.

Gastric Proton pump inhibitors: Omeprazole, Lansoprazole, Rabeprazole, Pantoprazole

Anti-neoplastic agents:

Alkylating agents: Meclourethamine*, Cyclophosphamide, Melphalan, Chlorambucil, Busulfan, Thiotepa

Antimetabolites: Mercaptopurine*, Thioguanine, Fluorouracil, Floxuridine, Cytarabine, Methotrexate*, Azathioprine

Antibiotics: Dactinomycin, Daunorubicin, Doxorubicin, Bleomycin

Plant products: Etoposide, Vinblastin sulphate, Vincristinsulphate

Miscellaneous: Cisplatin, Mitotane.

UNIT – II**10 Hours**

Anti-anginal:

Vasodilators: Amyl nitrite, Nitroglycerin*, Pentaerythritol tetranitrate, Isosorbide dinitrite*, Dipyridamole.

Calcium channel blockers: Verapamil, Bepridil hydrochloride, Diltiazem hydrochloride, Nifedipine, Amlodipine, Felodipine, Nicardipine, Nimodipine.

Diuretics:

Carbonic anhydrase inhibitors: Acetazolamide*, Methazolamide, Dichlorphenamide. Thiazides: Chlorthiazide*, Hydrochlorothiazide, Hydroflumethiazide, Cyclothiazide, Loop diuretics: Furosemide*, Bumetanide, Ethacrynic acid.

Potassium sparing Diuretics: Spironolactone, Triamterene, Amiloride. Osmotic Diuretics: Mannitol

Anti-hypertensive Agents: Timolol, Captopril, Lisinopril, Enalapril, Benazepril hydrochloride, Quinapril hydrochloride, Methyldopatehydrochloride,* Clonidine hydrochloride, Guanethidine monosulphate, Guanabenz acetate, Sodium nitroprusside, Diazoxide, Minoxidil, Reserpine, Hydralazine hydrochloride.

UNIT- III

10 Hours

Anti-arrhythmic Drugs: Quinidine sulphate, Procainamide hydrochloride, Disopyramide phosphate*, Phenytoin sodium, Lidocaine hydrochloride, Tocainide hydrochloride, Mexiletine hydrochloride, Lorcaïnide hydrochloride, Amiodarone, Sotalol.

Anti-hyperlipidemic agents: Clofibrate, Lovastatin, Cholesteramine and Cholestipol **Coagulant & Anticoagulants:** Menadione, Acetomenadione, Warfarin*, Anisindione, clopidogrel

Drugs used in Congestive Heart Failure: Digoxin, Digitoxin, Nesiritide, Bosentan, Tezosentan.

UNIT- IV

08 Hours

Drugs acting on Endocrine system

Nomenclature, Stereochemistry and metabolism of steroids

Sex hormones: Testosterone, Nandralone, Progesterones, Oestriol, Oestradiol, Oestrone, Diethyl stilbestrol.

Drugs for erectile dysfunction: Sildenafil, Tadalafil.

Oral contraceptives: Mifepristone, Norgestrel, Levonorgestrol

Corticosteroids: Cortisone, Hydrocortisone, Prednisolone, Betamethasone, Dexamethasone

Thyroid and antithyroid drugs: L-Thyroxine, L-Thyronine, Propylthiouracil, Methimazole.

UNIT – V

07 Hours

Antidiabetic agents:

Insulin and its preparations

Sulfonyl ureas: Tolbutamide*, Chlorpropamide, Glipizide, Glimepiride.

Biguanides: Metformin. Thiazolidinediones: Pioglitazone, Rosiglitazone.

Meglitinides: Repaglinide, Nateglinide. Glucosidase inhibitors: Acarbose, Voglibose.

Local Anesthetics: SAR of Local anesthetics

Benzoic Acid derivatives; Cocaine, Hexylcaine, Meprylcaine, Cyclomethycaine, Pierocaine. **Amino Benzoic acid derivatives:** Benzocaine*, Butamben, Procaine*, Butacaine, Propoxycaine, Tetracaine, Benoxinate.

Lidocaine/Anilide derivatives: Lignocaine, Mepivacaine, Prilocaine,

Etidocaine.

Miscellaneous: Phenacaine, Dipiperodon, and Dibucaine.*

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books

1. Foye's Principles of Medicinal Chemistry (2019). WoltersKluwer.
2. Burger's Medicinal Chemistry, Vol I toIV.
3. Remington's Pharmaceutical Sciences (2008).
4. Indian Pharmacopoeia (2018).

SEMESTER: V

Course Title: Industrial Pharmacy-I
Course Code: BP 502 T

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Know the various pharmaceutical dosage forms and their manufacturing techniques.
- 2 Identify various considerations in development of pharmaceutical dosage forms.
- 3 Formulate solid, liquid and semisolid dosage forms and evaluate them for their quality.
- 4 Understand the quality control of solid, liquid and semisolid dosage form

Course Content**UNIT-I****07 Hours**

Preformulation Studies: Introduction to preformulation, goals and objectives, study of physicochemical characteristics of drug substances.

a. Physical properties: Physical form (crystal & amorphous), particle size, shape, flow properties, solubility profile (pKa, pH, partition coefficient), polymorphism

b. Chemical Properties: Hydrolysis, oxidation, reduction, racemisation, polymerization BCS classification of drugs & its significant Application of preformulation considerations in the development of solid, liquid oral and parenteral dosage forms and its impact on stability of dosage forms.

UNIT-II**10 Hours****Tablets:**

- a Introduction, ideal characteristics of tablets, classification of tablets. Excipients, Formulation of tablets, granulation methods, compression and processing problems. Equipments and tabletooling.
- b Tablet coating: Types of coating, coating materials, formulation of coating composition, methods of coating, equipment employed and defects incoating.
- c Quality control tests: In process and finished product tests

Liquid orals:

Formulation and manufacturing consideration of syrups and elixirs suspensions and emulsions; Filling and packaging; evaluation of liquid orals official in pharmacopoeia

UNIT-III**08 Hours****Capsules:**

- a **Hard gelatin capsules:** Introduction, Production of hard gelatin capsule shells. Size of capsules, Filling, finishing and special techniques of

formulation of hard gelatin capsules, manufacturing defects. In process and final product quality control tests for capsules.

- b. **Soft gelatin capsules:** Nature of shell and capsule content, size of capsules, importance of base adsorption and min/mg factors, production, in process and final product quality control tests. Packing, storage and stability testing of soft gelatin capsules and their applications.
- c. **Pellets:** Introduction, formulation requirements, pelletization process, equipments for manufacture of pellets

UNIT-IV

10 Hours

Parenteral Products:

- Definition, types, advantages and limitations. Preformulation factors and essential requirements, vehicles, additives, importance of isotonicity
- Production procedure, production facilities and controls, aseptic processing
- Formulation of injections, sterile powders, large volume parenterals and lyophilized products.
- Containers and closures selection, filling and sealing of ampoules, vials and infusion fluids. Quality control tests of parenteral products.

Ophthalmic Preparations: Introduction, formulation considerations; formulation of eye drops, eye ointments and eye lotions; methods of preparation; labeling, containers; evaluation of ophthalmic preparations

UNIT-V

10 Hours

Cosmetics: Formulation and preparation of the following cosmetic preparations: lipsticks, shampoos, cold cream and vanishing cream, tooth pastes, hair dyes and sunscreens.

Pharmaceutical Aerosols: Definition, propellants, containers, valves, types of aerosol systems; formulation and manufacture of aerosols; Evaluation of aerosols; Quality control and stability studies.

Packaging Materials Science: Materials used for packaging of pharmaceutical products, factors influencing choice of containers, legal and official requirements for containers, stability aspects of packaging materials, quality control tests

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. H. C. Ansel, Lea & Febiger, Philadelphia (2005). Introduction to Pharmaceutical Dosage Forms.

SEMESTER: V

Course Title: PHARMACOLOGY-II
Course Code: BP503T

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the effect of drugs on physiological system.
- 2 Acquire the knowledge of newer targets of several disease conditions for treatment.
- 3 Appreciate correlation of pharmacology with related medical sciences.
- 4 Understand the Assumption the mechanism of drug action and its relevance in the treatment of different diseases.

Course Content:**UNIT-I****10 Hours****1. Pharmacology of drugs acting on cardio vascular system**

- a. Introduction to hemodynamic and electrophysiology of heart.
- b. Drugs used in congestive heart failure
- c. Anti-hypertensive drugs.
- d. Anti-anginal drugs.
- e. Anti-arrhythmic drugs.
- f. Anti-hyperlipidemic drugs.

UNIT-II**10 Hours****1. Pharmacology of drugs acting on cardio vascular system**

- a. Drug used in the therapy of shock.
- b. Hematinics, coagulants and anticoagulants.
- c. Fibrinolytics and anti-platelet drugs
- d. Plasma volume expanders

2. Pharmacology of drugs acting on urinary system

- a. Diuretics
- b. Anti-diuretics.

UNIT-III**10 Hours****3. Autocoids and related drugs**

- a. Introduction to autocoids and classification
- b. Histamine, 5-HT and their antagonists.
- c. Prostaglandins, Thromboxanes and Leukotrienes.
- d. Angiotensin, Bradykinin and Substance P.
- e. Non-steroidal anti-inflammatory agents
- f. Anti-gout drugs
- g. Antirheumatic drugs

UNIT-IV**08 Hours****5. Pharmacology of drugs acting on endocrinesystem**

- a. Basic concepts in endocrinepharmacology.
- b. Anterior Pituitary hormones- analogues and theirinhibitors.
- c. Thyroid hormones- analogues and theirinhibitors.
- d. Hormones regulating plasma calcium level- Parathormone, Calcitonin andVitamin-D.
- d. Insulin, Oral Hypoglycemic agents and glucagon.
- e. ACTH and corticosteroids.

UNIT-V**07 Hours****5. Pharmacology of drugs acting on endocrinesystem**

- a. Androgens and Anabolicsteroids.
- b. Estrogens, progesterone and oralcontraceptives.
- c. Drugs acting on the uterus.

6. Bioassay

- a. Principles and applications of bioassay.
- b. Types of bioassay
- c. Bioassay of insulin, oxytocin, vasopressin, ACTH, d-tubocurarine, digitalis, histamine and 5-HT

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Rang H. P., Dale M. M., Ritter J. M., Flower R. J (2019). Rang and Dale'sPharmacology, Churchil LivingstoneElsevier
2. Goodman and Gilman's (2017). The Pharmacological Basis ofTherapeutics

SEMESTER: V**Course Title: PHAMACOGNOSY AND PHYTOCHEMISTRY II****Course Code: BP504T**

L	T	P	Credits
3	1	0	2

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the preparation and development of herbal formulation.
- 2 Apply and Carry-out isolation and identification of phytoconstituents
- 3 Analyze the preparation and development of herbal formulation.
- 4 Evaluate the isolation and identification of phytoconstituents
- 5 Create the modern extraction techniques

Course Content:**UNIT-I****07 Hours****Metabolic pathways in higher plants and their determination**

- a) Brief study of basic metabolic pathways and formation of different secondary metabolites through these pathways- Shikimic acid pathway, Acetate pathways and amino acid pathway.
- b) Study of utilization of radioactive isotopes in the investigation of Biogenetic studies.

UNIT-II**14 Hours**

General introduction, composition, chemistry & chemical classes, biosources, therapeutic uses and commercial applications of following secondary metabolites:

Alkaloids: Vinca, Rauwolfia, Belladonna, Opium,**Phenylpropanoids and Flavonoids:** Lignans, Tea, Ruta**Steroids, Cardiac Glycosides & Triterpenoids:** Liquorice, Dioscorea, Digitalis**Volatile oils:** Mentha, Clove, Cinnamon, Fennel, Coriander,**Tannins:** Catechu, Pterocarpus**Resins:** Benzoin, Guggul, Ginger, Asafoetida, Myrrh, Colophony**Glycosides:** Senna, Aloes, Bitter Almond**Iridoids, Other terpenoids & Naphthaquinones:** Gentian, Artemisia, taxus, carotenoids**UNIT-III****06 Hours**

Isolation, Identification and Analysis of Phytoconstituents

- a) Terpenoids: Menthol, Citral, Artemisin
- b) Glycosides: Glycyrrhetic acid & Rutin
- c) Alkaloids: Atropine, Quinine, Reserpine, Caffeine
- d) Resins: Podophyllotoxin, Curcumin

UNIT-IV**10 Hours**

Industrial production, estimation and utilization of the following

phytoconstituents: Forskolin, Sennoside, Artemisinin, Diosgenin, Digoxin, Atropine, Podophyllotoxin, Caffeine, Taxol, Vincristine and Vinblastine

UNIT V**08 Hours****Basics of Phytochemistry**

Modern methods of extraction, application of latest techniques like Spectroscopy, chromatography and electrophoresis in the isolation, purification and identification of crude drugs.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

5. Dr.SH.Ansari, IInd edition (2007). Essentials of Pharmacognosy, Birla publications, New Delhi.

SEMESTER: V

Course Title: PHARMACEUTICAL JURISPRUDENCE
Course Code: BP505T

L	T	P	Credits
3	1	0	2

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals.
- 2 Apply Pharmaceutical legislations and their implications in the development and marketing of pharmaceuticals.
- 3 Analyze the code of ethics during the pharmaceutical practice.
- 4 Evaluate the basic knowledge on important legislations related to the profession of Pharmacy in India
- 5 Create detailed study of Schedules

Course Content:**UNIT-I****10 Hours****Drugs and Cosmetics Act, 1940 and its rules 1945:**

Objectives, Definitions, Legal definitions of schedules to the Act and Rules
 Import of drugs – Classes of drugs and cosmetics prohibited from import, Import under license or permit. Offences and penalties.
 Manufacture of drugs – Prohibition of manufacture and sale of certain drugs, Conditions for grant of license and conditions of license for manufacture of drugs,
 Manufacture of drugs for test, examination and analysis, manufacture of new drug, loan license and repacking license.

UNIT-II**10 Hours****Drugs and Cosmetics Act, 1940 and its rules 1945.**

Detailed study of Schedule G, H, M, N, P, T, U, V, X, Y, Part XII B, Sch F & DMR (OA) Sale of Drugs – Wholesale, Retail sale and restricted license. Offences and penalties Labeling & Packing of drugs- General labeling requirements and specimen labels for drugs and cosmetics, List of permitted colors. Offences and penalties.
 Administration of the Act and Rules – Drugs Technical Advisory Board, Central drugs Laboratory, Drugs Consultative Committee, Government drug analysts, licensing authorities, controlling authorities, Drugs Inspectors

UNIT-III**10 Hours**

Pharmacy Act –1948: Objectives, Definitions, Pharmacy Council of India; its constitution and functions, Education Regulations, State and Joint state pharmacy councils; constitution and functions, Registration of Pharmacists, Offences and Penalties

Medicinal and Toilet Preparation Act –1955: Objectives, Definitions, Licensing, Manufacture In bond and Outside bond, Export of alcoholic

preparations, Manufacture of Ayurvedic, Homeopathic, Patent & Proprietary Preparations. Offences and Penalties.

Narcotic Drugs and Psychotropic substances Act-1985 and Rules: Objectives, Definitions, Authorities and Officers, Constitution and Functions of narcotic & Psychotropic Consultative Committee, National Fund for Controlling the Drug Abuse, Prohibition, Control and Regulation, opium poppy cultivation and production of poppy straw, manufacture, sale and export of opium, Offences and Penalties

UNIT-IV

08 Hours

Study of Salient Features of Drugs and Magic Remedies Act and its rules: Objectives, Definitions, Prohibition of certain advertisements, Classes of Exempted advertisements, Offences and Penalties

Prevention of Cruelty to animals Act-1960: Objectives, Definitions, Institutional Animal Ethics Committee, CPCSEA guidelines for Breeding and Stocking of Animals, Performance of Experiments, Transfer and acquisition of animals for experiment, Records, Power to suspend or revoke registration, Offences and Penalties

National Pharmaceutical Pricing Authority: Drugs Price Control Order (DPCO)- 2013. Objectives, Definitions, Sale prices of bulk drugs, Retail price of formulations, Retail price and ceiling price of scheduled formulations, National List of Essential Medicines (NLEM)

UNIT-V

07 Hours

Pharmaceutical Legislations – A brief review, Introduction, Study of drugs enquiry committee, Health survey and development committee, Hathi committee and Mudaliar committee

Code of Pharmaceutical ethics Definition, Pharmacist in relation to his job, trade, medical profession and his profession, Pharmacist's oath

Medical Termination of Pregnancy Act

Right to Information Act

Introduction to Intellectual Property Rights (IPR) Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended books: (Latest Edition)

1. B.M. Mithal (2017). Text book of Forensic Pharmacy, Nirali Publication.
2. N.K. Jain (2020). A text book of Forensic Pharmacy.
3. Drugs and Cosmetics Act/Rules by Govt. of India publications.
4. Medicinal and Toilet preparations act 1955 by Govt. of India publications.
5. Narcotic drugs and psychotropic substances act by Govt. of India publications
6. Drugs and Magic Remedies act by Govt. of India publication
7. Bare Acts of the said laws published by Government. Reference books(Theory)

SEMESTER: V**Course Title:Industrial Pharmacy-I Lab****Course Code: BP506P**

L	T	P	Credits
0	0	4	2

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Articulate solid, liquid and semisolid dosage forms and evaluate them for their Quality.
- 2 Understand and appreciate the influence of pharmaceutical additives.
- 3 Know about Development of pharmaceutical dosage form.
- 4 Design and layout of various procedures in pharmaceutical industry.

Course Content

1. Preformulation studies on paracetamol/asparin/or any otherdrug
2. Preparation and evaluation of Paracetamoltablets
3. Preparation and evaluation of Aspirintablets
4. Coating of tablets- film coating oftables/granules
5. Preparation and evaluation of Tetracyclinecapsules
6. Preparation of Calcium Gluconateinjection
7. Preparation of Ascorbic Acidinjection
8. Qulaity control test of (as per IP) marketed tablets andcapsules
9. Preparation of Eye drops/ and Eyeointments
10. Preparation of Creams (cold / vanishingcream)
11. Evaluation of Glass containers (as perIP)

Recommended Books: (Latest Editions)

1. H. C. Ansel, Lea &Febiger, Philadelphia (2005). *Introduction to Pharmaceutical Dosage Forms*.

SEMESTER: V**Course Title: PHARMACOLOGY-II**

L	T	P	Credits
0	0	4	2

Course Code: BP507P**Total:45 Hours****Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Demonstrate the various receptor actions using isolated tissue preparation.
- 2 Establish isolation of different organs/tissues from the laboratory animals by simulated experiments
- 3 Perform various in-vitro experiments to demonstrate receptor action
- 4 Appreciate the correlation of pharmacology with related medical sciences

Course Content

1. Introduction to *in-vitro* pharmacology and physiological saltsolutions.
2. Effect of drugs on isolated frogheart.
3. Effect of drugs on blood pressure and heart rate ofdog.
4. Study of diuretic activity of drugs usingrats/mice.
5. DRC of acetylcholine using frog rectus abdominismuscle.
6. Effect of physostigmine and atropine on DRC of acetylcholine using frog rectus abdominis muscle and rat ileumrespectively.
7. Bioassay of histamine using guinea pig ileum by matchingmethod.
8. Bioassay of oxytocin using rat uterine horn by interpolationmethod.
9. Bioassay of serotonin using rat fundus strip by three pointbioassay.
10. Bioassay of acetylcholine using rat ileum/colon by four pointbioassay.
11. Determination of PA₂ value of prazosin using rat anococcygeus muscle (bySchild's plot method).
12. Determination of PD₂ value using guinea pigileum.
13. Effect of spasmogens and spasmolytics using rabbitjejunum.
14. Anti-inflammatory activity of drugs using carrageenan induced paw-edemamodel.
15. Analgesic activity of drug using central and peripheralmethods

Note: All laboratory techniques and animal experiments are demonstrated by simulated experiments by softwares and videos

Recommended Books (Latest Editions)

1. RangH.P.,DaleM.M., RitterJ.M.,FlowerR.J(2019).RangandDale'sPharmacology, Churchill LivingstoneElsevier
2. Goodman and Gilman's (2017). The Pharmacological Basis ofTherapeutics

SEMESTER: V**Course Title: PHARMACOGNOSY AND PHYTOCHEMISTRY****Course Code: BP508P**

L	T	P	Credits
0	0	4	2

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the preparation and development of herbal formulation.
- 2 Apply isolation and identification of phytoconstituents
- 3 Analyze the identification of phytoconstituents
- 4 Evaluate the development of herbal formulation.
- 5 Find out the separation of sugars by paper chromatography

Course Content

1. Morphology, histology and powder characteristics & extraction & detection of: Cinchona, Cinnamon, Senna, Clove, Ephedra, Fennel and Coriander
2. Exercise involving isolation & detection of active principles
 - a. Caffeine - from tea dust.
 - b. Diosgenin from Dioscorea
 - c. Atropine from Belladonna
 - d. Sennosides from Senna
3. Separation of sugars by Paper chromatography
4. TLC of herbal extract
5. Distillation of volatile oils and detection of phytoconstituents by TLC
6. Analysis of crude drugs by chemical tests:
 - (i) Asafoetida (ii) Benzoin (iii) Colophony (iv) Aloes (v) Myrrh

Recommended Books: (Latest Editions)

1. W.C. Evans (2009). Trease and Evans *Pharmacognosy*, 16th edition, W.B. Saunders & Co., London.
2. Tyler, V.E., Brady, L.R. and Robbers (1988) J.E., *Pharmacognosy*, Lea and Febiger, Philadelphia.
3. C.K. Kokate, Purohit, Gokhale (2007), *Text book of Pharmacognosy*. Nirali Prakashan, New Delhi.
4. R.D. Choudhary (1996) Herbal drug industry, Eastern Publisher, New Delhi.
5. Dr. S.H. Ansari, 1st edition (2007). Essentials of Pharmacognosy, Birla publications, New Delhi.

SEMESTER: VI

Course Title: MEDICINAL CHEMISTRY – III
Course Code: BP601T

L	T	P	Credits
3	1	0	4

Total: 45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the importance of drug design and different techniques of drug design.
- 2 Assume drug metabolism, bioavailability, and pharmacokinetics.
- 3 Analyze the result of drug designing and relationship of SAR.
- 4 Evaluate the relationship between structure and biological activity of drug.
- 5 Discover and design the drug with modern techniques.

Course Content:

Study of the development of the following classes of drugs, Classification, mechanism of action, uses of drugs mentioned in the course, Structure activity relationship of selective class of drugs as specified in the course and synthesis of drugs superscripted by(*)

UNIT – I**10 Hours****Antibiotics**

Historical background, Nomenclature, Stereochemistry, Structure activity relationship, Chemical degradation classification and important products of the following classes.

β-Lactam antibiotics: Penicillin, Cephalosporins, β- Lactamase inhibitors, Monobactams

Aminoglycosides: Streptomycin, Neomycin, Kanamycin

Tetracyclines: Tetracycline, Oxytetracycline, Chlortetracycline, Minocycline, Doxycycline

UNIT – II**10 Hours****Antibiotics**

Historical background, Nomenclature, Stereochemistry, Structure activity relationship, Chemical degradation classification and important products of the following classes.

Macrolide: Erythromycin Clarithromycin, Azithromycin.

Miscellaneous: Chloramphenicol*, Clindamycin.

Prodrugs: Basic concepts and application of prodrugs design.

Antimalarials: Etiology of malaria.

Quinolines: SAR, Quinine sulphate, Chloroquine*, Amodiaquine, Primaquine phosphate, Pamaquine*, Quinacrine hydrochloride, Mefloquine.

Biguanides and dihydro triazines: Cycloguanil pamoate, Proguanil.

Miscellaneous: Pyrimethamine, Artesunate, Artemether, and Atovoquone.

UNIT – III**10 Hours****Anti-tubercular Agents**

Synthetic anti tubercular agents: Isoniazid*, Ethionamide, Ethambutol, Pyrazinamide, Para amino salicylic acid.*

Anti-tubercular antibiotics: Rifampicin, Rifabutin, Cycloserine, Streptomycin, Capreomycin sulphate.

Urinary tract anti-infective agents

Quinolones: SAR of quinolones, Nalidixic Acid, Norfloxacin, Enoxacin, Ciprofloxacin*, Ofloxacin, Lomefloxacin, Sparfloxacin, Gatifloxacin, Moxifloxacin

Miscellaneous: Furazolidine, Nitrofurantoin*, Methanamine.

Antiviral agents:

Amantadine hydrochloride, Rimantadine hydrochloride, Idoxuridine trifluoride, Acyclovir*, Gancyclovir, Zidovudine, Didanosine, Zalcitabine, Lamivudine, Loviride, Delavirding, Ribavirin, Saquinavir, Indinavir, Ritonavir.

UNIT – IV

08 Hours

Antifungal agents:

Antifungal antibiotics: Amphotericin-B, Nystatin, Natamycin, Griseofulvin.

Synthetic Antifungal agents: Clotrimazole, Econazole, Butoconazole, Oxiconazole, Tioconazole, Miconazole*, Ketoconazole, Terconazole, Itraconazole, Fluconazole, Naftifine hydrochloride, Tolnaftate*.

Anti-protozoal Agents: Metronidazole*, Tinidazole, Ornidazole, Diloxanide, Iodoquinol, Pentamidine Isethionate, Atovaquone, Eflornithine.

Anthelmintics: Diethylcarbamazine citrate*, Thiabendazole, Mebendazole*, Albendazole, Niclosamide, Oxamniquine, Praziquantal, Ivermectin.

Sulphonamides and Sulfones

Historical development, chemistry, classification and SAR of Sulfonamides:

Sulphamethizole, Sulfoxazole, Sulphamethazine, Sulfacetamide*, Sulphapyridine, Sulfamethoxazole*, Sulphadiazine, Mefenide acetate, Sulfasalazine.

Folate reductase inhibitors: Trimethoprim*, Cotrimoxazole.

Sulfones: Dapsone*.

UNIT – V

07 Hours

Introduction to Drug Design

Various approaches used in drug design.

Physicochemical parameters used in quantitative structure activity relationship (QSAR) such as partition coefficient, Hammett's electronic parameter, Taft's steric parameter and Hansch analysis.

Pharmacophore modeling and docking techniques.

Combinatorial Chemistry: Concept and applications of combinatorial chemistry: solid phase and solution phase synthesis.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books

1. Foye's Principles of Medicinal Chemistry (2019). WoltersKluwer.
2. Burger's Medicinal Chemistry, Vol I to IV.
3. Remington's Pharmaceutical Sciences (2008).
4. Indian Pharmacopoeia (2018).

SEMESTER: VI**Course Title: PHARMACOLOGY-III****Course Code: BP602T**

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the pharmacological activity of drug.
- 2 Apply their assumption on drug metabolism, bioavailability, and pharmacokinetics.
- 3 Analyze the result of drug designing and relationship of SAR.
- 4 Evaluate the relationship between structure and biological activity of drug.
- 5 Create, discover and design the drug with modern techniques.

Course Content:**UNIT-I****10 Hours****1. Pharmacology of drugs acting on Respiratory system**

- a. Anti-asthmatic drugs
- b. Drugs used in the management of COPD
- c. Expectorants and antitussives
- d. Nasal decongestants
- e. Respiratory stimulants

2. Pharmacology of drugs acting on the Gastrointestinal Tract

- a. Antiulcer agents.
- b. Drugs for constipation and diarrhoea.
- c. Appetite stimulants and suppressants.
- d. Digestants and carminatives.
- e. Emetics and anti-emetics.

UNIT-II**10 Hours****3. Chemotherapy**

- a. General principles of chemotherapy.
- b. Sulfonamides and cotrimoxazole.
- c. Antibiotics- Penicillins, cephalosporins, chloramphenicol, macrolides, quinolones and fluoroquinolones, tetracycline and aminoglycosides

UNIT-III**10 Hours****3. Chemotherapy**

- a. Antitubercular agents
- b. Antileprotic agents
- c. Antifungal agents
- d. Antiviral drugs
- e. Anthelmintics
- f. Antimalarial drugs
- g. Antiamoebic agents

UNIT-IV**08 Hours**

3. Chemotherapy

- f. Urinary tract infections and sexually transmitted diseases.
- g. Chemotherapy of malignancy.

4. Immunopharmacology

- a. Immunostimulants
 - b. Immunosuppressant
- Protein drugs, monoclonal antibodies, target drugs to antigen, biosimilars

UNIT-V**07 Hours****5. Principles of toxicology**

- a. Definition and basic knowledge of acute, subacute and chronic toxicity.
- b. Definition and basic knowledge of genotoxicity, carcinogenicity, teratogenicity and mutagenicity
- c. General principles of treatment of poisoning
- d. Clinical symptoms and management of barbiturates, morphine, and organophosphorus compound and lead, mercury and arsenic poisoning.

6. Chronopharmacology

- a. Definition of rhythm and cycles.
- b. Biological clock and their significance leading to chronotherapy

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Rang H. P., Dale M. M., Ritter J. M., Flower R. J (2019). Rang and Dale's Pharmacology, Churchill Livingstone Elsevier
2. Goodman and Gilman's (2017). The Pharmacological Basis of Therapeutics

SEMESTER: VI**Course Title: HERBAL DRUG TECHNOLOGY****Course Code: BP603T**

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the raw material as source of herbal drugs from cultivation to herbal drug product.
- 2 Apply their ideas on the WHO and ICH guidelines for evaluation of herbal drugs.
- 3 Analyze the behavior of herbal cosmetics, natural sweeteners, nutraceuticals.
- 4 Evaluate WHO & ICH guidelines for the assessment of herbal drugs. Stability testing of herbal drugs.
- 5 Follow the ideas on GMP GUIDELINES.

Course content:**UNIT-I****11 Hours****Herbs as raw materials**

Definition of herb, herbal medicine, herbal medicinal product, herbal drug preparation Source of Herbs

Selection, identification and authentication of herbal materials processing of herbal raw material

Biodynamic Agriculture

Good agricultural practices in cultivation of medicinal plants including Organic farming. Pest and Pest management in medicinal plants: Biopesticides/Bioinsecticides.

Indian Systems of Medicine

- a) Basic principles involved in Ayurveda, Siddha, Unani and Homeopathy
- b) Preparation and standardization of Ayurvedic formulations viz Aristas and Asawas, Ghutika, Churna, Lehya and Bhasma.

UNIT-II**07 Hours****Nutraceuticals**

General aspects, Market, growth, scope and types of products available in the market. Health benefits and role of Nutraceuticals in ailments like Diabetes, CVS diseases, Cancer, Irritable bowel syndrome and various Gastro intestinal diseases.

Study of following herbs as health food: Alfaalfa, Chicory, Ginger, Fenugreek, Garlic, Honey, Amla, Ginseng, Ashwagandha, Spirulina

Herbal-Drug and Herb-Food Interactions:

General introduction to interaction and classification.

Study of following drugs and their possible side effects and interactions: Hypercium, kava-kava, Ginkobiloba, Ginseng, Garlic, Pepper & Ephedra.

UNIT-III**10 Hours****Herbal Cosmetics**

Sources and description of raw materials of herbal origin used via, fixed oils,

waxes, gumscolors, perfumes, protective agents, bleaching agents, antioxidants in products such as skincare, hair care and oral hygiene products.

Herbal excipients:

Herbal Excipients – Significance of substances of natural origin as excipients – colorants, sweeteners, binders, diluents, viscosity builders, disintegrants, flavors & perfumes.

Herbal formulations:

Conventional herbal formulations like syrups, mixtures and tablets and Novel dosage forms like phytosomes

UNIT- IV

10 Hours

Evaluation of Drugs WHO & ICH guidelines for the assessment of herbal drugs Stability testing of herbal drugs.

Patenting and Regulatory requirements of natural products:

- a) Definition of the terms: Patent, IPR, Farmers right, Breeder's right, Bioprospecting and Biopiracy
- b) Patenting aspects of Traditional Knowledge and Natural Products. Case study of Curcuma & Neem.

Regulatory Issues - Regulations in India (ASU DTAB, ASU DCC), Regulation of manufacture of ASU drugs - Schedule Z of Drugs & Cosmetics Act for ASU drugs.

UNIT-V

07 Hours

General Introduction to Herbal Industry

Herbal drugs industry: Present scope and future prospects.

A brief account of plant-based industries and institutions involved in work on medicinal and aromatic plants in India.

Schedule T – Good Manufacturing Practice of Indian systems of medicine

Components of GMP (Schedule – T) and its objectives

Infrastructural requirements, working space, storage area, machinery and equipments, standard operating procedures, health and hygiene, documentation and records.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. W.C.Evans (2009). Trease and Evans Pharmacognosy, 16th edition, W.B. Saunders & Co., London.
2. Tyler, V.E., Brady, L.R. and Robbers (1988) J.E., Pharmacognosy, Lea and Febiger, Philadelphia.
3. C.K. Kokate, Purohit, Gokhale (2007), Text book of Pharmacognosy. Nirali Prakashan, New Delhi.
4. R.D. Choudhary (1996) Herbal drug industry, Eastern Publisher, New Delhi.
5. Dr. S.H. Ansari, 2nd edition (2007). Essentials of Pharmacognosy, Birla publications, New Delhi

SEMESTER: VI**Course Title: BIOPHARMACEUTICS AND PHARMACOKINETICS****Course Code: BP604T**

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the concepts of bioavailability and bioequivalence of drug products and their significance
- 2 Apply the concept of metabolism, elimination, bioavailability and bioequivalence.
- 3 Analyze the principles of pharmacokinetics that underline the absorption, distribution, metabolism and elimination of drug.
- 4 Evaluate the effect of physiological factor and variability of pharmacokinetics parameters towards drug deposition within body.
- 5 Understand the various causes of non-linear pharmacokinetics.

Course Content:**UNIT-I****10 Hours****Introduction Biopharmaceutics to Absorption;**

Mechanisms of drug absorption through GIT, factors influencing drug absorption through GIT, absorption of drug from Non per oral extra-vascular routes,

Distribution

Tissue permeability of drugs, binding of drugs, apparent, volume of drug distribution, plasma and tissue protein binding of drugs, factors affecting protein-drug binding. Kinetics of protein binding, Clinical significance of protein binding of drugs

UNIT- II**10 Hours****Elimination:**

Drug metabolism and basic understanding metabolic pathways renal excretion of drugs, factors affecting renal excretion of drugs, renal clearance, Non renal routes of drug excretion of drugs

Bioavailability and Bioequivalence:

Definition and Objectives of bioavailability, absolute and relative bioavailability, measurement of bioavailability, *in-vitro* drug dissolution models, *in-vitro-in-vivo* correlations, bioequivalence studies, methods to enhance the dissolution rates and bioavailability of poorly soluble drugs.

UNIT- III**10 Hours****Pharmacokinetics:**

Definition and introduction to Pharmacokinetics, Compartment models, Non compartment models, physiological models, one compartment open model.

- (a) Intravenous Injection (Bolus)
- (b) Intravenous infusion and

(c) Extra vascular administrations.

Pharmacokinetics parameters - KE , $t_{1/2}$, VD , AUC , K_a , Cl_t and CLR - definitions methods of eliminations, understanding of their significance and Application

UNIT- IV

08 Hours

Multicompartment models:

Two compartment open model. IV bolus Kinetics of multiple dosing, steady state drug levels, calculation of loading and maintenance doses and their significance in clinical settings.

UNIT- V

07 Hours

Nonlinear Pharmacokinetics:

- a. Introduction,
- b. Factors causing Non-linearity.
- c. Michaelis-menton method of estimating parameters, Explanation with example of drugs.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. Thomas (1995) .N. Tozen, Lea and Febrger, Philadelphia.
2. Dissolution, Bioavailability and Bioequivalence (1989) By Abdou H.M, Mack, Publishing Company, Pennsylvania.
3. Rebert F Notari Marcel 1987. Biopharmaceutics and Clinical Pharmacokinetics-An introduction, New York and Basel.

SEMESTER: VI**Course Title: PHARMACEUTICAL BIOTECHNOLOGY****Course Code: BP605T**

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Design research strategy with step-by-step instructions to address a research problem.
- 2 Explain the concept and application of monoclonal antibody technology
- 3 Know about the Importance of Monoclonal antibodies in Industries
- 4 Appreciate the use of microorganisms in fermentation technology

Course Content**Unit I****10 Hours**

- a) Brief introduction to Biotechnology with reference to Pharmaceutical Sciences.
- b) Enzyme Biotechnology- Methods of enzyme immobilization and applications.
- c) Biosensors- Working and applications of biosensors in Pharmaceutical Industries.
- d) Brief introduction to Protein Engineering.
- e) Use of microbes in industry. Production of Enzymes- General consideration – Amylase, Catalase, Peroxidase, Lipase, Protease, Penicillinase.
- f) Basic principles of genetic engineering.

Unit II**10 Hours**

- a) Study of cloning vectors, restriction endonucleases and DNA ligase.
- b) Recombinant DNA technology. Application of genetic engineering in medicine.
- c) Application of r DNA technology and genetic engineering in the production of:
 - i) Interferon
 - ii) Vaccines- hepatitis-B
 - iii) Hormones- Insulin.
- d) Brief introduction to PCR

Unit III**10 Hours**

Types of immunity- humoral immunity, cellular immunity

- a) Structure of Immunoglobulins
- b) Structure and Function of MHC
- c) Hypersensitivity reactions, Immune stimulation and Immune suppressions.
- d) General method of the preparation of bacterial vaccines, toxoids, viral vaccine, antitoxins, serum-immune blood derivatives and other products relative to immunity.
- e) Storage conditions and stability of official vaccines
- f) Hybridoma technology- Production, Purification and Applications
- g) Blood products and Plasma Substitutes.

Unit IV**08 Hours**

- a) Immuno blotting techniques- ELISA, Western blotting, Southern blotting.
- b) Genetic organization of Eukaryotes and Prokaryotes
- c) Microbial genetics including transformation, transduction, conjugation, plasmids and transposons.
- d) Introduction to Microbial biotransformation and applications.
- e) Mutation: Types of mutation/mutants.

Unit V

07 Hours

- a) Fermentation methods and general requirements, study of media, equipments, sterilization methods, aeration process, stirring.
- b) Large scale production fermenter design and its various controls.
- c) Study of the production of –penicillins, citric acid, Vitamin B12, Glutamic acid, Griseofulvin,
- d) Blood Products: Collection, Processing and Storage of whole human blood, dried human plasma, and plasma Substitutes.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest edition):

1. B.R. Glick and J.J. Pasternak (2017). Molecular Biotechnology: Principles and Applications of Recombinant DNA: ASM Press Washington D.C.
2. RA Goldshy et. Al.: Kuby Immunology.
3. J.W. Goding: Monoclonal Antibodies.

SEMESTER: VI**Course Title: PHARMACEUTICAL QUALITY ASSURANCE****Course Code: BP606T**

L	T	P	Credits
3	1	0	4

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the responsibilities of QA & QC departments, cGMP aspects in a pharmaceutical industry
- 2 Apply GMP overviews of ICH guidelines.
- 3 Analyze the scope of quality certifications applicable to pharmaceutical industries
- 4 Evaluate the basic fundamental of quality concepts.
- 5 Acquire a thorough understanding of important QC, QA.

Course Content**UNIT – I****10 Hours**

Quality Assurance and Quality Management concepts: Definition and concept of Quality control, Quality assurance and GMP

Total Quality Management (TQM): Definition, elements, philosophies

ICH Guidelines: purpose, participants, process of harmonization, Brief overview of QSEM, with special emphasis on Q-series guidelines, ICH stability testing guidelines

Quality by design (QbD): Definition, overview, elements of QbD program, tools

ISO 9000 & ISO 14000: Overview, Benefits, Elements, steps for registration

NABL accreditation: Principles and procedures

UNIT – II**10 Hours**

Organization and personnel: Personnel responsibilities, training, hygiene and personal records.

Premises: Design, construction and plant layout, maintenance, sanitation, environmental control, utilities and maintenance of sterile areas, control of contamination.

Equipments and raw materials: Equipment selection, purchase specifications, maintenance, purchase specifications and maintenance of stores for raw materials.

UNIT – III**10 Hours**

Quality Control: Quality control test for containers, rubber closures and secondary packing materials.

Good Laboratory Practices: General Provisions, Organization and Personnel, Facilities, Equipment, Testing Facilities Operation, Test and Control Articles, Protocol for Conduct of a Nonclinical Laboratory Study, Records and Reports, Disqualification of Testing Facilities

UNIT – IV**08 Hours**

Complaints: Complaints and evaluation of complaints, Handling of return good, recalling and Waste disposal.

Document maintenance in pharmaceutical industry: Batch

Formula Record, Master Formula

Record, SOP, Quality audit, Quality Review and Quality documentation, Reports and documents, distribution records.

UNIT – V**07 Hours**

Calibration and Validation: Introduction, definition and general principles of calibration, qualification and validation, importance and scope of validation, types of validation, validation master plan. Calibration of pH meter, Qualification of UV-Visible spectrophotometer, General principles of Analytical method Validation.

Warehousing: Good warehousing practice, materials management

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Edition)

1. Quality Assurance Guide by organization of Pharmaceutical Products of India.
2. Good Laboratory Practice Regulations, 2nd Edition, Sandy Weinberg Vol.69.
3. ISO 9000 and Total Quality Management – Sadhank G Ghosh
4. The International Pharmacopoeia(2018) Vol I, II, III, IV- General Methods of Analysis and Quality specification for Pharmaceutical Substances, Excipients and Dosage forms
5. ICH guidelines, ISO 9000 and 14000 guidelines

SEMESTER: VI**Course Title: MEDICINAL CHEMISTRY- III Lab****Course Code: BP607P**

L	T	P	Credits
0	0	4	2

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

1. Understand the structure, chemistry and therapeutic value of drugs and
2. Apply synthesis and SAR of drug.
3. Analyze the chemistry of drug.
4. Evaluate the relationship between structure and biological activity of various drug molecules.
5. Create the structure and physical properties of drugs to their pharmacological activity.

Course Content**I. Preparation of drugs and intermediates**

- 1 Sulphanilamide
- 2 7-Hydroxy, 4-methylcoumarin
- 3 3-Chlorobutanol
- 4 Triphenylimidazole
- 5 Tolbutamide
- 6 Hexamine

II Assay of drugs

1. Isonicotinic acid hydrazide
2. Chloroquine
3. Metronidazole
4. Dapsone
5. Chlorpheniraminemaleate
6. Benzylpenicillin

III Preparation of medicinally important compounds or intermediates by Microwave irradiation technique

IV Drawing structures and reactions using chemdraw®

V Determination of physicochemical properties such as logP, clogP, MR, Molecular weight, Hydrogen bond donors and acceptors for class of drugs course content using drug design software Drug likeliness screening (LipinskiesRO5)

Recommended Books

1. Foye's Principles of Medicinal Chemistry (2019). WoltersKluwer.
2. Burger's Medicinal Chemistry, Vol I to IV.
3. Remington's Pharmaceutical Sciences (2008).
4. Indian Pharmacopoeia (2018).

SEMESTER: VI**Course Title: PHARMACOLOGY-III Lab****Course Code: BP608P**

L	T	P	Credits
0	0	4	2

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the various Biostatistics methods in experimental pharmacology.
- 2 Apply drugs into animal and record response.
- 3 Analyze various in-vitro experiments to demonstrate receptor action using isolated tissue preparation.
- 4 Evaluate the toxic effects of drugs.
- 5 Create record report of drugs therapeutic effects.

Course Content

1. Dose calculation in pharmacological experiments
 2. Anti-allergic activity by mast cell stabilization assay
 3. Study of anti-ulcer activity of a drug using pylorus ligand (SHAY) rat model and NSAIDs induced ulcer model.
 4. Study of effect of drugs on gastrointestinal motility
 5. Effect of agonist and antagonists on guinea pig ileum
 6. Estimation of serum biochemical parameters by using semi-auto analyser
 7. Effect of saline purgative on frog intestine
 8. Insulin hypoglycemic effect in rabbit
 9. Test for pyrogens (rabbit method)
 10. Determination of acute oral toxicity (LD₅₀) of a drug from a given data
 11. Determination of acute skin irritation / corrosion of a test substance
 12. Determination of acute eye irritation / corrosion of a test substance
 13. Calculation of pharmacokinetic parameters from a given data
 14. Biostatistics methods in experimental pharmacology (student's t test, ANOVA)
 15. Biostatistics methods in experimental pharmacology (Chi square test, Wilcoxon Signed Rank test)
- *Experiments are demonstrated by simulated experiments/videos

Recommended Books (Latest Editions)

1. Rang H.P., Dale M.M., Ritter J.M., Flower R.J (2019). Rang and Dale's Pharmacology, Churchill Livingstone Elsevier
- Goodman and Gilman's (2017). The Pharmacological Basis of Therapeutics

SEMESTER: VI**Course Title: HERBAL DRUG TECHNOLOGY Lab****Course Code: BP609 P**

L	T	P	Credits
0	0	4	2

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the Management of quality of medicinal plant products and derivatives.
- 2 Apply raw material as source of herbal drugs from cultivation to herbal drug product.
- 3 Analyze Quality and Quantity Assurance of herbal drugs, cosmetics.
- 4 Evaluate toxicological aspects of active ingredients and finished products, WHO & ICH guidelines for the assessment of herbal drugs Stability testing of herbal drugs.
- 5 Create herbal formulations like syrups, mixtures and tablets and Novel dosage

Course Content

1. To perform preliminary phytochemical screening of crude drugs.
2. Determination of the alcohol content of Asava and Arista
3. Evaluation of excipients of natural origin
4. Incorporation of prepared and standardized extract in cosmetic formulations like creams, lotions and shampoos and their evaluation.
5. Incorporation of prepared and standardized extract in formulations like syrups, mixtures and tablets and their evaluation as per Pharmacopoeial requirements.
6. Monograph analysis of herbal drugs from recent Pharmacopoeias
7. Determination of Aldehyde content
8. Determination of Phenol content
9. Determination of total alkaloids

Recommended Books: (Latest Editions)

1. W.C. Evans (2009). Trease and Evans Pharmacognosy, 16th edition, W.B. Saunders & Co., London.
2. Tyler, V.E., Brady, L.R. and Robbers (1988) J.E., Pharmacognosy, Lea and Febiger, Philadelphia.
3. C.K. Kokate, Purohit, Gokhale (2007), Text book of Pharmacognosy. Nirali Prakashan, New Delhi.
4. R.D. Choudhary (1996) Herbal drug industry, Eastern Publisher, New Delhi.
5. Dr. S.H. Ansari, 1st edition (2007). Essentials of Pharmacognosy, Birla publications, New Delhi.

SEMESTER: VII**Course Title: INSTRUMENTAL METHODS OF ANALYSIS****Course Code: BP701T**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Appreciate the interaction of matter with electromagnetic radiations and its applications in drug analysis.
- 2 Comprehend the chromatographic separation and analysis of drugs
- 3 Understand quantitative & qualitative analysis of drugs using various analytical Instruments
- 4 Learn documentation and express the observations with clarity.

Course Content**UNIT –I****10 Hours****UV Visible spectroscopy**

Electronic transitions, chromophores, auxochromes, spectral shifts, solvent effect on absorption spectra, Beer and Lambert's law, Derivation and deviations.

Instrumentation - Sources of radiation, wavelength selectors, sample cells, detectors- Photo tube, Photomultiplier tube, Photo voltaic cell, Silicon Photodiode.

Applications - Spectrophotometric titrations, Single component and multi component analysis

Fluorimetry

Theory, Concepts of singlet, doublet and triplet electronic states, internal and external conversions, factors affecting fluorescence, quenching, instrumentation and applications

UNIT –II**10 Hours****IR spectroscopy**

Introduction, fundamental modes of vibrations in poly atomic molecules, sample handling, factors affecting vibrations

Instrumentation - Sources of radiation, wavelength selectors, detectors - Golay cell, Bolometer, Thermocouple, Thermister, Pyroelectric detector and applications **Flame Photometry**-Principle, interferences, instrumentation and applications

Atomic absorption spectroscopy- Principle, interferences, instrumentation and applications

Nepheloturbidometry- Principle, instrumentation and applications

UNIT –III**10 Hours****Introduction to chromatography**

Adsorption and partition column chromatography-Methodology, advantages, disadvantages and applications.

Thin layer chromatography- Introduction, Principle, Methodology, R_f values, advantages, disadvantages and applications.

Paper chromatography-Introduction, methodology, development techniques, advantages, disadvantages and applications

Electrophoresis- Introduction, factors affecting electrophoretic mobility, Techniques of paper, gel, capillary electrophoresis, applications

UNIT –IV**08 Hours**

Gas chromatography - Introduction, theory, instrumentation, derivatization, temperature programming, advantages, disadvantages and applications

High performance liquid chromatography (HPLC)-Introduction, theory, instrumentation, advantages and applications.

UNIT –V**07 Hours**

Ion exchange chromatography- Introduction, classification, ion exchange resins, properties, mechanism of ion exchange process, factors affecting ion exchange, methodology and applications

Gel chromatography- Introduction, theory, instrumentation and applications

Affinity chromatography- Introduction, theory, instrumentation and applications

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. B.K Sharma (2004). Instrumental Methods of Chemical Analysis, CBS publication.

SEMESTER: VII

Course Title: INDUSTRIAL PHARMACY II
Course Code: BP702T

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Know the process of pilot plant and scale up of pharmaceutical dosage forms.
- 2 Understand the process of technology transfer from lab scale to commercial Batch.
- 3 Recognize different Laws and Acts that regulate pharmaceutical industry
- 4 Comprehend the approval process and regulatory requirements for drug products.
- 5 Recognize different Laws and Acts that regulate pharmaceutical industry

Course Content:**UNIT-I****10 Hours**

Pilot plant scale up techniques: General considerations - including significance of personnel requirements, space requirements, raw materials, Pilot plant scale up considerations for solids, liquid orals, semi solids and relevant documentation, SUPAC guidelines, Introduction to platform technology

UNIT-II**10 Hours**

Technology development and transfer: WHO guidelines for Technology Transfer (TT) :Terminology, Technology transfer protocol, Quality risk management, Transfer from R& D to production (Process, packaging and cleaning), Granularity of TT Process (API, excipients, finished products, packaging materials) Documentation, Premises and equipments, qualification and validation, quality control, analytical method transfer, Approved regulatory bodies and agencies, Commercialization - practical aspects and problems (case studies), TT agencies in India - APCTD, NRDC, TIFAC, BCIL, TBSE /SIDBI; TT related documentation confidentiality agreement, licensing, MoUs, legal issues

UNIT-III**10 Hours**

Regulatory affairs: Introduction, Historical overview of Regulatory Affairs, Regulatory authorities, Role of Regulatory affairs department, Responsibility of Regulatory Affairs Professionals

Regulatory requirements for drug approval: Drug Development Teams, Non- Clinical Drug Development, Pharmacology, Drug Metabolism and Toxicology, General considerations of Investigational New Drug (IND) Application, Investigator's Brochure (IB) and New Drug Application (NDA), Clinical research / BE studies, Clinical Research Protocols, Biostatistics in Pharmaceutical Product Development, Data Presentation for FDA Submissions, Management of Clinical Studies.

UNIT-IV

08 Hours

Quality management systems: Quality management & Certifications: Concept of Quality, Total Quality Management, Quality by Design (QbD), Six Sigma concept, Out of Specifications (OOS), Change control, Introduction to ISO 9000 series of quality systems standards, ISO 14000, NABL, GLP

UNIT-V

07 Hours

Indian Regulatory Requirements: Central Drug Standard Control Organization (CDSCO) and State Licensing Authority: Organization, Responsibilities, Certificate of Pharmaceutical Product (COPP), Regulatory requirements and approval procedures for new Drugs.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. H. C. Ansel, Lea & Febiger, Philadelphia (2005). Introduction to Pharmaceutical Dosage Forms.

SEMESTER: VII**Course Title: PHARMACY PRACTICE****Course Code: BP703T**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand drug distribution methods in hospital and apply it in the practice of pharmacy.
- 2 Apply and Interpret role of pharmacist in education and training program.
- 3 Analyze requirements essential for hospital, community and hospital pharmacy management.
- 4 Evaluate medication history, medication adherence and adverse effects of drugs
- 5 Develop clinical report, adverse reaction report of patients

Course Content**Unit I****10 Hours****a) Hospital and its organization**

Definition, Classification of hospital- Primary, Secondary and Tertiary hospitals, Classification based on clinical and non- clinical basis, Organization Structure of a Hospital, and Medical staffs involved in the hospital and their functions.

b) Hospital pharmacy and its organization

Definition, functions of hospital pharmacy, Organization structure, Location, Layout and staff requirements, and Responsibilities and functions of hospital pharmacists.

c) Adverse drug reaction

Classifications - Excessive pharmacological effects, secondary pharmacological effects, idiosyncrasy, allergic drug reactions, genetically determined toxicity, toxicity following sudden withdrawal of drugs, Drug interaction- beneficial interactions, adverse interactions, and pharmacokinetic drug interactions, Methods for detecting drug interactions, spontaneous case reports and record linkage studies, and Adverse drug reaction reporting and management.

d) Community Pharmacy

Organization and structure of retail and wholesale drug store, types and design, Legal requirements for establishment and maintenance of a drug store, Dispensing of proprietary products, maintenance of records of retail and wholesale drug store.

Unit II**10 Hours****a) Drug distribution system in a hospital**

Dispensing of drugs to inpatients, types of drug distribution systems, charging policy and labelling, Dispensing of drugs to ambulatory patients, and Dispensing of controlled drugs.

b) Hospital formulary

Definition, contents of hospital formulary,

Differentiation of hospital formulary and Drug list, preparation and revision, and addition and deletion of drug from hospital formulary.

c) Therapeutic drug monitoring

Need for Therapeutic Drug Monitoring, Factors to be considered during the Therapeutic Drug Monitoring, and Indian scenario for Therapeutic Drug Monitoring.

d) Medication adherence

Causes of medication non-adherence, pharmacist role in the medication adherence, and monitoring of patient medication adherence.

e) Patient medication history interview

Need for the patient medication history interview, medication interview forms.

f) Community pharmacy management

Financial, materials, staff, and infrastructure requirements.

Unit III

10 Hours

a) Pharmacy and therapeutic committee

Organization, functions, Policies of the pharmacy and therapeutic committee in including drugs into formulary, inpatient and outpatient prescription, automatic stop order, and emergency drug list preparation.

b) Drug information services

Drug and Poison information centre, Sources of drug information, Computerised services, and storage and retrieval of information.

c) Patient counseling

Definition of patient counseling; steps involved in patient counseling, and Special cases that require the pharmacist

d) Education and training program in the hospital

Role of pharmacist in the education and training program, Internal and external training program, Services to the nursing homes/clinics, Code of ethics for community pharmacy, and Role of pharmacist in the interdepartmental communication and community health education.

e) Prescribed medication order and communication skills

Prescribed medication order- interpretation and legal requirements, and Communication skills- communication with prescribers and patients.

Unit IV

08 Hours

a) Budget preparation and implementation

Budget preparation and implementation

b) Clinical Pharmacy

Introduction to Clinical Pharmacy, Concept of clinical pharmacy, functions and responsibilities of clinical pharmacist, Drug therapy monitoring - medication chart review, clinical review, pharmacist intervention, Ward round participation, Medication history and Pharmaceutical care. Dosing pattern and drug therapy based on Pharmacokinetic & disease pattern.

c) Over the counter (OTC) sales

Introduction and sale of over the counter, and rational use of common over the counter medications.

Unit V

07 Hours

a) Drug store management and inventory control

Organisation of drug store, types of materials stocked and storage conditions,

Purchase and inventory control: principles, purchase procedure, purchase order, procurement and stocking, Economic order quantity, Reorder quantity level, and Methods used for the analysis of the drug expenditure

b) Investigational use of drugs

Description, principles involved, classification, control, identification, role of hospital pharmacist, advisory committee.

c) Interpretation of Clinical Laboratory Tests

Blood chemistry, hematology, and urinalysis

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

SEMESTER: VII

Course Title: NOVEL DRUG DELIVERY SYSTEMS
Course Code: BP704T

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand various properties of sustained and controlled drug delivery systems.
- 2 Apply formulation and evaluation of various controlled drug delivery system for oral and parenteral.
- 3 Analyze design of a drug delivery system.
- 4 Evaluate current development in drug delivery system.
- 5 Create selection of drugs and polymers for the development of Novel drug delivery systems, their formulation and evaluation.

Course Content**Unit-I****10 Hours**

Controlled drug delivery systems: Introduction, terminology/definitions and rationale, advantages, disadvantages, selection of drug candidates. Approaches to design controlled release formulations based on diffusion, dissolution and ion exchange principles. Physicochemical and biological properties of drugs relevant to controlled release formulations

Polymers: Introduction, classification, properties, advantages and application of polymers in formulation of controlled release drug delivery systems.

Unit-II**10 Hours**

Microencapsulation: Definition, advantages and disadvantages, microspheres/microcapsules, microparticles, methods of microencapsulation, applications

Mucosal Drug Delivery system: Introduction, Principles of bioadhesion / mucoadhesion, concepts, advantages and disadvantages, transmucosal permeability and formulation considerations of buccal delivery systems

Implantable Drug Delivery Systems: Introduction, advantages and disadvantages, concept of implants and osmotic pump

Unit-III**10 Hours**

Transdermal Drug Delivery Systems: Introduction, Permeation through skin, factors affecting permeation, permeation enhancers, basic components of TDDS, formulation approaches

Gastroretentive drug delivery systems: Introduction, advantages, disadvantages, approaches for GRDDS – Floating, high density systems, inflatable and gastroadhesive systems and their applications

Nasopulmonary drug delivery system: Introduction to Nasal and Pulmonary routes of drug delivery, Formulation of Inhalers (dry powder and metered

dose), nasal sprays, nebulizers

Unit-IV

08 Hours

Targeted drug Delivery: Concepts and approaches advantages and disadvantages, introduction to liposomes, niosomes, nanoparticles, monoclonal antibodies and their applications

Unit-V

07 Hours

Ocular Drug Delivery Systems: Introduction, intra ocular barriers and methods to overcome

–Preliminary study, ocular formulations and ocuserts

Intrauterine Drug Delivery Systems: Introduction, advantages and disadvantages, development of intra uterine devices (IUDs) and applications

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

SEMESTER: VII**Course Title: INSTRUMENTAL METHODS OF ANALYSIS****Course Code: BP705P**

L	T	P	Credits
0	0	4	2

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Prepare accurate analysis and report the results in defined formats.
- 2 Develop practical skills for the analysis of drugs and excipients using various instrumentation techniques.
- 3 Perform quantitative and qualitative analysis of drugs using various analytical methods
- 4 Understand the chromatographic separation and analysis of drugs.

Course Content

- 1 Determination of absorption maxima and effect of solvents on absorption maxima of organic compounds
- 2 Estimation of dextrose by colorimetry
- 3 Estimation of sulfanilamide by colorimetry
- 4 Simultaneous estimation of ibuprofen and paracetamol by UV spectroscopy
- 5 Assay of paracetamol by UV-Spectrophotometry
- 6 Estimation of quinine sulfate by fluorimetry
- 7 Study of quenching of fluorescence
- 8 Determination of sodium by flame photometry
- 9 Determination of potassium by flame photometry
- 10 Determination of chlorides and sulphates by nephelometry
- 11 Separation of amino acids by paper chromatography
- 12 Separation of sugars by thin layer chromatography
- 13 Separation of plant pigments by column chromatography
- 14 Demonstration experiment on HPLC
- 15 Demonstration experiment on Gas Chromatography

Recommended Books (Latest Editions)

1. B.K Sharma (2004). Instrumental Methods of Chemical Analysis, CBS publication.

SEMESTER: VIII**Course Title:BIOSTATISTICS AND RESEARCH METHODOLOGY****Course Code: BP801T**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand about operation of M.S. Excel, SPSS, R and MINITAB, DoE (Design of Experiment).
- 2 Apply design of Experiments, Experiential Design Technique, plagiarism, Histogram, Pie Chart, Cubic Graph, response surface plot, Counter Plot graph
- 3 Analyze distinguish the application of statistical in clinical data management
- 4 Evaluate the sample size determination and Power of a study, Report writing and presentation of data, Protocol, Cohorts studies, Observational studies, Experimental studies, Designing clinical trial, various phases
- 5 Create the appreciate statistical techniques in solving the problems

Course Content**Unit-I****10 Hours****Introduction:** Statistics, Biostatistics, Frequency distribution**Measures of central tendency:** Mean, Median, Mode- Pharmaceutical examples**Measures of dispersion:** Dispersion, Range, standard deviation, Pharmaceutical problems**Correlation:** Definition, Karl Pearson's coefficient of correlation, multiple correlation - Pharmaceuticals examples**10 Hours****Unit-II****Regression:** Curve fitting by the method of least squares, fitting the lines $y = a + bx$ and $x = a + by$, Multiple regression, standard error of regression- Pharmaceutical Examples**Probability:** Definition of probability, Binomial distribution, Normal distribution, Poisson's distribution, properties – problems Sample, Population, large sample, small sample, Null hypothesis, alternative hypothesis, sampling, essence of sampling, types of sampling, Error-I type, Error-II type, Standard error of mean (SEM) - Pharmaceutical examples**Parametric test:** t-test (Sample, Pooled or Unpaired and Paired), ANOVA, (One way and Two way), Least Significance difference**Unit-III****10 Hours****Non Parametric tests:** Wilcoxon Rank Sum Test, Mann-Whitney U test,

Kruskal-Wallis test, Friedman Test

Introduction to Research: Need for research, Need for design of Experiments, Experimental Design Technique, plagiarism

Graphs: Histogram, Pie Chart, Cubic Graph, response surface plot, Counter Plot graph

Designing the methodology: Sample size determination and Power of a study, Report writing and presentation of data, Protocol, Cohorts studies, Observational studies, Experimental studies, Designing clinical trial, various phases.

Unit-IV

08 Hours

Blocking and confounding system for Two-level factorials

Regression modeling: Hypothesis testing in Simple and Multiple regression models

Introduction to Practical components of Industrial and Clinical Trials

Problems: Statistical Analysis Using Excel, SPSS, MINITAB®, DESIGN OF EXPERIMENTS, R - Online Statistical Software's to Industrial and Clinical trial approach

Unit-V

07 Hours

Design and Analysis of experiments:

Factorial Design: Definition, 2², 2³ design. Advantage of factorial design

Response Surface methodology: Central composite design, Historical design, Optimization Techniques

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest edition):

1. S.C.Guptha (2018). Fundamental of Statistics – Himalaya Publishing House

SEMESTER: VIII**Course Title: SOCIAL AND PREVENTIVE PHARMACY****Course Code: BP802T**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Acquire high consciousness/realization of current issues related to health and pharmaceutical problems within the country and worldwide.
- 2 Apply a critical way of thinking based on current health care development
- 3 Analyze improvement in rural sanitation, national urban health mission, Health promotion and education in school
- 4 Evaluate alternative ways of solving problems related to health and Pharmaceutical issues.
- 5 Create a better health care service system.

Course Content**Unit I****10 Hours**

Concept of health and disease: Definition, concepts and evaluation of public health.

Understanding the concept of prevention and control of disease, social causes of diseases and social problems of the sick.

Social and health education: Food in relation to nutrition and health, Balanced diet, Nutritional deficiencies, Vitamin deficiencies, Malnutrition and its prevention.

Sociology and health: Socio cultural factors related to health and disease, Impact of urbanization on health and disease, Poverty and health

Hygiene and health: personal hygiene and health care; avoidable habits

Unit II**10 Hours**

Preventive medicine: General principles of prevention and control of diseases such as cholera, SARS, Ebola virus, influenza, acute respiratory infections, malaria, chicken guinea, dengue, lymphatic filariasis, pneumonia, hypertension, diabetes mellitus, cancer, drug addiction-drug substance abuse

Unit III**10 Hours**

National health programs, its objectives, functioning and outcome of the following:

HIV AND AIDS control programme, TB, Integrated disease surveillance program (IDSP), National leprosy control programme, National mental health program, National programme for prevention and control of deafness, Universal immunization programme, National programme for control of blindness, Pulse

polio programme.

Unit IV

8 Hours

National health intervention programme for mother and child, National family welfare programme, National tobacco control programme, National Malaria Prevention Program, National programme for the health care for the elderly, Social health programme; role of WHO in Indian national program

Unit V

07 Hours

Community services in rural, urban and school health: Functions of PHC, Improvement in rural sanitation, national urban health mission, Health promotion and education in school

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest edition):

1. Short Textbook of Preventive and Social Medicine, Prabhakara, 2010 JAYPEE Publications
2. Mahajan and Gupta 2008. Textbook of Preventive and Social Medicine SahaIndranil, JAYPEE Publications
3. Community Pharmacy Practice, Ramesh Adepu, BSP publishers, Hyderabad

Recommended Journals:

1. Research in Social and Administrative Pharmacy, Elsevier, Ireland

SEMESTER: VIII**Course Title: PHARMA MARKETING MANAGEMENT****Course Code: BP803ET**

L	T	P	Credits
6	2	0	8

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand know how of marketing management and grooming the people for taking a challenging role in Sales and Product management.
- 2 Apply new product decisions; Product branding, packaging and labeling decisions, Product management in pharmaceutical industry.
- 3 Analyze distinguish the methods, determinants of promotional mix, promotional budget. ; Analyzing consumer buying behavior; industrial buying behavior.
- 4 Evaluate of the various policies for drug inventory management.
- 5 Create retail and wholesale marketing.

Course Content**Unit I****10 Hours****Marketing:**

Definition, general concepts and scope of marketing; Distinction between marketing & selling; Marketing environment; Industry and competitive analysis; analyzing consumer buying behavior; industrial buying behavior.

Pharmaceutical market:

Quantitative and qualitative aspects; size and composition of the market; demographic descriptions and socio-psychological characteristics of the consumer; market segmentation&targeting.Consumer profile; Motivation and prescribing habits of the physician; patients' choice of physician and retail pharmacist.Analyzing the Market;Roleof market research.

Unit II**10 Hours****Product decision:**

Classification, product line and product mix decisions, product life cycle, product portfolio analysis; product positioning; new product decisions; Product branding, packaging and labeling decisions, Product management in pharmaceutical industry.

Unit III 10 HoursPromotion:

Methods, determinants of promotional mix, promotional budget; An overview of personal selling, advertising, direct mail, journals, sampling, retailing, medical exhibition, public relations, online promotional techniques for OTC Products.

Unit IV**10 Hours**

Pharmaceutical marketing channels:

Designing channel, channel members, selecting the appropriate channel, conflict in channels, physical distribution management: Strategic importance, tasks in physical distribution management.

Professional sales representative (PSR):

Duties of PSR, purpose of detailing, selection and training, supervising, norms for customer calls, motivating, evaluating, compensation and future prospects of the PSR.

Unit V**10 Hours****Pricing:**

Meaning, importance, objectives, determinants of price; pricing methods and strategies, issues in price management in pharmaceutical industry. An overview of DPCO (Drug Price Control Order) and NPPA (National Pharmaceutical Pricing Authority).

Emerging concepts in marketing:

Vertical & Horizontal Marketing; Rural Marketing; Consumerism; Industrial Marketing; Global Marketing.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. Philip Kotler and Kevin Lane Keller (2017). Marketing Management, Prentice Hall of India, New Delhi

SEMESTER: VIII**Course Title: PHARMACEUTICAL REGULATORY SCIENCE****Course Code: BP804 ET**

L	T	P	Credits
6	2	0	8

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand about the process of drug discovery and development.
- 2 Apply clinical studies, Innovator and generics, Concept of generics, Generic drug product development.
- 3 Analyze about legal aspects and quality polices for drug manufacturing
- 4 Evaluatethe regulatory approval process and their registration in Indian and international markets.
- 5 Identify the regulatory authorities and agencies governing the manufacture and sale of pharmaceuticals.

Course Content**Unit I****10 Hours****New Drug Discovery and development**

Stages of drug discovery, Drug development process, pre-clinical studies, non-clinical activities, clinical studies, Innovator and generics, Concept of generics, Generic drug product development.

Unit II**10 Hours****Regulatory Approval Process**

Approval processes and timelines involved in Investigational New Drug (IND), New Drug Application (NDA), Abbreviated New Drug Application (ANDA). Changes to an approved NDA / ANDA.

Regulatory authorities and agencies

Overview of regulatory authorities of India, United States, European Union, Australia, Japan, Canada (Organization structure and types of applications)

Unit III**10 Hours****Registration of Indian drug product in overseas market**

Procedure for export of pharmaceutical products, Technical documentation, Drug Master Files (DMF), Common Technical Document (CTD), electronic Common Technical Document (eCTD), ASEAN Common Technical Document(ACTD)research.

Unit IV**08 Hours****Clinical trials**

Developing clinical trial protocols, Institutional Review Board / Independent Ethics committee - formation and working procedures, Informed consent process and procedures, GCP obligations of Investigators, sponsors & Monitors, Managing and Monitoring clinical trials, Pharmacovigilance –

safety monitoring in clinical trials

Unit V

07 Hours

Regulatory Concepts

Basic terminology, guidance, guidelines, regulations, Laws and Acts, Orange book, Federal Register, Code of Federal Regulatory, Purple book

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended books (Latest edition):

1. Dr. N.S. Vyawahare (1905). Drug Regulatory Affairs by SachinItkar, Nirali Prakashan.

SEMESTER: VIII**Course Title: PHARMACOVIGILANCE****Course Code: BP 805T**

L	T	P	Credits
6	2	0	8

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand about national and international scenario of pharmacovigilance
- 2 Apply the various methods that can be used to generate safety data and signal detection
- 3 Develop the skills of classifying drugs, diseases and adverse drug reactions.
- 4 Evaluate why drug safety monitoring is important.
- 5 Create differences in Indian and global pharmacovigilance requirements.

Course Content**Unit I****10 Hours****Introduction to Pharmacovigilance**

History and development of Pharmacovigilance Importance of safety monitoring of Medicine WHO international drug monitoring programme Pharmacovigilance Program of India (PvPI)

Introduction to adverse drug reactions

Definitions and classification of ADRs Detection and reporting Methods in Causality assessment Severity and seriousness assessment Predictability and preventability assessment Management of adverse drug reactions

Basic terminologies used in pharmacovigilance

Terminologies of adverse medication related events Regulatory terminologies

Unit II**10 Hours****Drug and disease classification**

Anatomical, therapeutic and chemical classification of drugs International classification of diseases daily defined doses International Non-proprietary Names for drugs

Drug dictionaries and coding in pharmacovigilance

WHO adverse reaction terminologies MedDRA and Standardised MedDRA queries

WHO drug dictionary

Eudravigilance medicinal product dictionary

Information resources in pharmacovigilance Basic drug information resources specialised resources for ADRs

Establishing pharmacovigilance programme

Establishing in a hospital Establishment & operation of drug safety department in industry Contract Research Organisations (CROs) Establishing a national programme

Unit III**10 Hours****Vaccine safety surveillance**

Vaccine Pharmacovigilance Vaccination failure
Adverse events following immunization

Pharmacovigilance methods

Passive surveillance – Spontaneous reports and case series Stimulated reporting

Active surveillance – Sentinel sites, drug event monitoring and registries

Comparative observational studies – Cross sectional study, case control study and cohort study

Targeted clinical investigations

Communication in pharmacovigilance

Effective communication in Pharmacovigilance Communication in Drug Safety Crisis management

Communicating with Regulatory Agencies, Business Partners, Healthcare facilities &Media

UnitIV**08 Hours****Safety data generation**

Pre-clinical phase Clinical phase

Post approval phase (PMS)

ICH Guidelines for Pharmacovigilance Organization and objectives of ICH

Expedited reporting

Individual case safety reports Periodic safety update reports Post approval expedited reporting Pharmacovigilance planning

Good clinical practice in pharmacovigilance studies

Unit V**07 Hours****Pharmacogenomics of adverse drug reactions**

Genetics related ADR with example focusing PK parameters.

Drug safety evaluation in special populationPaediatrics

Pregnancy and lactation Geriatrics

CIOMS

CIOMS Working Groups CIOMS Form

CDSCO (India) and Pharmacovigilance

D&C Act and Schedule Y

Differences in Indian and global pharmacovigilance requirements

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest edition):

1. Practical Drug Safety from A to Z by Barton Cobert, Pierre Biron, Jones and Bartlett Publishers.
2. Mann's Pharmacovigilance: Elizabeth B. Andrews, Nicholas, Wiley Publishers.
3. Stephens' Detection of New Adverse Drug Reactions: John Talbot, Patrick Walle, Wiley Publishers.
4. An Introduction to Pharmacovigilance: Patrick Waller, WileyPublishers.

SEMESTER: VIII**Course Title: QUALITY CONTROL AND STANDARDIZATION OF HERBALS****Course Code: BP 806 ET**

L	T	P	Credits
6	2	0	8

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the regulatory approval process and its registration in Indian and international markets.
- 2 Apply WHO guidelines for quality control of herbal drugs.
- 3 Analyze EU and ICH guidelines for quality control of herbal drugs.
- 4 Evaluate quality assurance in herbal drug industry
- 5 Create preparation of documents for new drug application and export registration

Course Content**Unit I****10 Hours**

Basic tests for drugs – Pharmaceutical substances, Medicinal plants materials and dosage Forms WHO guidelines for quality control of herbal drugs. Evaluation of commercial crude drugs intended for use

Unit II**10 Hours**

Quality assurance in herbal drug industry of cGMP, GAP, GMP and GLP in traditional system of medicine.

WHO Guidelines on current good manufacturing Practices (cGMP) for Herbal Medicines WHO Guidelines on GACP for Medicinal Plants.

Unit III**10 Hours**

EU and ICH guidelines for quality control of herbal drugs.

Research Guidelines for Evaluating the Safety and Efficacy of Herbal Medicines

Unit IV**08Hours**

Stability testing of herbal medicines. Application of various chromatographic techniques in standardization of herbal products.

Preparation of documents for new drug application and export registration GMP requirements and Drugs & Cosmetics Act provisions.

Unit V**07 Hours**

Regulatory requirements for herbal medicines.

WHO guidelines on safety monitoring of herbal medicines in pharmacovigilance systems Comparison of various Herbal Pharmacopoeias.

Role of chemical and biological markers in standardization of herbal products

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books: (Latest Editions)

1. Rangari, V.D.(2006) Text book of Pharmacognosy and Phytochemistry Vol. I, CarrierPub.
2. Mukherjee, P.W.(2002).Quality Control of Herbal Drugs: An Approach to Evaluation of Botanicals. Business Horizons Publishers, New Delhi, India.

SEMESTER: VIII**Course Title: COMPUTER AIDED DRUG DESIGN****Course Code: BP 807 ET**

L	T	P	Credits
6	2	0	8

Total: 45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand design and discovery of lead molecule. Stages of drug discovery and development
- 2 Apply approaches to lead discovery based on traditional medicine, Random screening, Non-random screening, serendipitous drug discovery, lead discovery based on drug metabolism, lead discovery based on clinical observation.
- 3 Analyze the concept of QSAR and docking
- 4 Evaluate about various strategies to develop new drug.
- 5 Create design new drug molecules using molecular modeling software.

Course Content**UNIT-I****10 Hours****Introduction to Drug Discovery and Development**

Stages of drug discovery and development

Lead discovery and Analog Based Drug Design

Rational approaches to lead discovery based on traditional medicine, Random screening, Non-random screening, serendipitous drug discovery, lead discovery based on drug metabolism, lead discovery based on clinical observation.

Analog Based Drug Design: Bioisosterism, Classification, Bioisosteric replacement. Any three case studies

UNIT-II**10 Hours****Quantitative Structure Activity Relationship (QSAR)**

SAR versus QSAR, History and development of QSAR, Types of physicochemical parameters, experimental and theoretical approaches for the determination of physicochemical parameters such as Partition coefficient, Hammett's substituent constant and Taft's steric constant. Hansch analysis, Free Wilson analysis, 3D-QSAR approaches like COMFA and COMSIA.

UNIT-III**10 Hours****Molecular Modeling and virtual screening techniques**

Virtual Screening techniques: Drug likeness screening, Concept of pharmacophore mapping and pharmacophore-based Screening,

Molecular docking: Rigid docking, flexible docking, manual docking, Docking based screening. *De novo* drug design.

UNIT-IV**08 Hours****Informatics & Methods in drug design**

Introduction to Bioinformatics, cheminformatics. ADME databases,

chemical, biochemical and pharmaceutical databases.

UNIT-V**07 Hours**

Molecular Modeling: Introduction to molecular mechanics and quantum mechanics. Energy Minimization methods and Conformational Analysis, global conformational minima determination.

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Robert GCK, ed., "Drug Action at the Molecular Level" University Park Press Baltimore.
2. Martin YC. "Quantitative Drug Design" Dekker, New York.

SEMESTER: VIII**Course Title: CELL AND MOLECULAR BIOLOGY****Course Code: BP808ET**

L	T	P	Credits
6	2	0	8

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the chemical foundation of cell biology know about the cellular functioning and composition
- 2 Apply ; DNA and the Flow of Molecular Information ,DNA Functioning, DNA and RNA,Types of RNA
- 3 Validate properties of cells and cell membrane.
- 4 Evaluate comprehend the DNA properties of cell biology.
- 5 Create recognize about the history of cell and molecular biology

Course Content**Unit I****10 Hours**

- a) Cell and Molecular Biology: Definitions theory and basics and Applications.
- b) Cell and Molecular Biology: History and Summation.
- c) Properties of cells and cell membrane.
- d) Prokaryotic versus Eukaryotic
- e) Cellular Reproduction
- f) Chemical Foundations – an Introduction and Reactions (Types)

Unit II**10 Hours**

- a) DNA and the Flow of Molecular Information
- b) DNA Functioning
- c) DNA and RNA
- d) Types of RNA
- e) Transcription and Translation

Unit III**10 Hours**

- a) Proteins: Defined and Amino Acids
- b) Protein Structure
- c) Regularities in Protein Pathways
- d) Cellular Processes
- e) Positive Control and significance of Protein Synthesis

Unit IV**08 Hours**

- a) Science of Genetics
- b) Transgenics and Genomic Analysis
- c) Cell Cycle analysis
- d) Mitosis and Meiosis
- e) Cellular Activities and Checkpoints

Unit V**07 Hours**

- a) Cell Signals:Introduction
- b) Receptors for CellSignals
- c) Signaling Pathways:Overview
- d) Misregulation of SignalingPathways
- e) Protein-Kinases:Functioning

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (latest edition):

1. W.B. Hugo and A.D. Russel: Pharmaceutical Microbiology, Blackwell Scientific publications, OxfordLondon.
2. RA Goldshy et. al., Kuby Immunology.

SEMESTER: VIII**Course Title: COSMETIC SCIENCE****Course Code: BP809ET**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand types of cosmetics and cosmetic expients.
- 2 Apply principles of formulation of cosmetics products
- 3 Analze the quality of skin care products
- 4 Evaluate skin and hair texture usingvarious instruments
- 5 Create new cosmetic products after identification of skin problems.

Course Content**UNIT I****10 Hours**

Classification of cosmetic and cosmeceutical products.

Definition of cosmetics as per Indian and EU regulations, Evolution of cosmeceuticals from cosmetics, cosmetics as quasi and OTC drugs

Cosmetic excipients: Surfactants, rheologymodifiers, humectants, emollients, preservatives. Classification and application

Skin: Basic structure and function of skin.

Hair: Basic structure of hair. Hair growth cycle.

Oral Cavity: Common problem associated with teeth and gums.

UNIT II**10 Hours**

Principles of formulation and building blocks of skin care products:

Face wash, Moisturizing cream, Cold Cream, Vanishing cream and their advantages and disadvantages.Application of these products in formulation of cosmeceuticals.

Antiperspants& deodorants- Actives & mechanism of action.

Principles of formulation and building blocks of Hair care products:

Conditioning shampoo, Hair conditioner, anti-dandruff shampoo, Hairoils.

Chemistry and formulation of Para-phylenediamine-based hair dye. Principles of formulation and building blocks of oral care products: Toothpaste for bleeding gums, sensitive teeth. Teeth whitening, Mouthwash.

UNIT III**10 Hours**

Sun protection, Classification of Sunscreens and SPF.

Role of herbs in cosmetics:

Skin Care: Aloe and turmeric Hair care: Henna and amla. Oral care: Neem and clove

Analytical cosmetics: BIS specification and analytical methods for shampoo, skincream and toothpaste.

UNIT IV**08 Hours**

Principles of Cosmetic Evaluation: Principles of sebumeter, corneometer. Measurement of TEWL, Skin Color, Hair tensile strength, Hair combing properties Soaps, and syndet bars. Evolution and skin benefits.

UNIT V**07 Hours**

Oily and dry skin, causes leading to dry skin, skin moisturisation. Basic understanding of the terms comedogenic, dermatitis.

Cosmetic problems associated with Hair and scalp: Dandruff, Hair fall causes

Cosmetic problems associated with skin: blemishes, wrinkles, acne, prickly heat and body odor.

Antiperspirants and Deodorants- Actives and mechanism of action

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

References

1) Harry's Cosmetology, Wilkinson, Moore, Seventh Edition, George Godwin.

SEMESTER: VIII**Course Title: PHARMACOLOGICAL SCREENING METHODS****Course Code: BP810T**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand techniques for collection of blood and common routes of drug administration in laboratory animals, Techniques of blood collection and euthanasia.
- 2 Apply the application of various commonly used laboratory animals.
- 3 Analyze topic, review of literature, research hypothesis and study design Pre- clinical data analysis
- 4 Evaluation of biostatistics and research methodology. Appreciate the application of various commonly used laboratory animals.
- 5 Create the various screening methods used in preclinical research.

Course Content**Unit –I****08 Hours****Laboratory Animals:**

Study of CPCSEA and OECD guidelines for maintenance, breeding and conduct of experiments on laboratory animals, Common lab animals: Description and applications of different species and strains of animals. Popular transgenic and mutant animals.

Techniques for collection of blood and common routes of drug administration in laboratory animals, Techniques of blood collection and euthanasia.

Unit–II**10 Hours****Preclinical screening models**

a. Introduction: Dose selection, calculation and conversions, preparation of drug solution/suspensions, grouping of animal's and importance of sham negative and positive control groups.

Rationale for selection of animal species and sex for the study.

b.Study of screening animal models for

Diuretics, nootropics, anti-Parkinson's, antiasthmatics,

Preclinical screening models: for CNS activity- analgesic, antipyretic, anti-inflammatory, general anaesthetics, sedative and hypnotics, antipsychotic, antidepressant, antiepileptic, antiparkinsonism, Alzheimer's disease

Unit –III**10 Hours**

Preclinical screening models: for ANS activity, sympathomimetics, sympatholytics, parasympathomimetics, parasympatholytics, skeletal muscle relaxants, drugs acting on eye, local anaesthetics

Unit-IV**05 Hours**

Preclinical screening models: for CVS activity- antihypertensives, diuretics, antiarrhythmic, antidyslipidemic, anti aggregatory, coagulants, and anticoagulants Preclinical screening models for other important drugs like antiulcer, antidiabetic, anticancer and antiasthmatics.

Research methodology and Bio-statistics

Selection of research topic, review of literature, research hypothesis and study design Pre- clinical data analysis and interpretation using Students't' test and One-way ANOVA. Graphical representation of data

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (latest edition):

1. Fundamentals of experimental Pharmacology-byM.N.Ghosh

SEMESTER: VIII**Course Title: ADVANCED INSTRUMENTATION TECHNIQUES****Course Code: BP811ET**

L	T	P	Credits
3	1	0	4

Total:45 Hours**Learning Outcomes**

On successful completion of this course, the students will be able to:

- 1 Understand the advanced instruments used and its applications in drug analysis.
- 2 Apply the chromatographic separation and analysis of drugs
- 3 Analyze the subject that deals with the application of instrumental methods in qualitative and quantitative analysis of drugs
- 4 Evaluation comprehend the calibration of various analytical instruments
- 5 Create general principle and procedure involved in the solid phase extraction and liquid-liquid extraction

Course Content**UNIT-I****10 Hours****Nuclear Magnetic Resonance spectroscopy**

Principles of H-NMR and C-NMR, chemical shift, factors affecting chemical shift, coupling constant, Spin - spin coupling, relaxation, instrumentation and applications

Mass Spectrometry- Principles, Fragmentation, Ionization techniques – Electron impact, chemical ionization, MALDI, FAB, Analyzers-Time of flight and Quadrupole, instrumentation, applications

UNIT-II**10 Hours**

Thermal Methods of Analysis: Principles, instrumentation and applications of Thermogravimetric Analysis (TGA), Differential Thermal Analysis (DTA), Differential Scanning Calorimetry (DSC)

X-Ray Diffraction Methods: Origin of X-rays, basic aspects of crystals, X-ray Crystallography, rotating crystal technique, single crystal diffraction, powder diffraction, structural elucidation and applications.

UNIT-III**10 Hours**

Calibration and validation-as per ICH and USFDA guidelines

Calibration of following Instruments

Electronic balance, UV-Visible spectrophotometer, IR spectrophotometer, Fluorimeter, Flame Photometer, HPLC and GC

UNIT-IV**08 Hours**

Radio immune assay: Importance, various components, Principle, different methods, Limitation and Applications of Radio immuno assay

Extraction techniques: General principle and procedure involved in the solid phase extraction and liquid-liquid extraction

UNIT-V**07 Hours****Hyphenated techniques**-LC-MS/MS, GC-MS/MS, HPTLC-MS.**Transaction Mode**

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning

Recommended Books (Latest Editions)

1. Instrumental Methods of Chemical Analysis by B.KSharma
2. Spectrophotometric identification of Organic Compounds by Silverstein

SEMESTER: VIII

Course Title: DIETARY SUPPLEMENTS AND NUTRACEUTICALS I
Course Code: BP812ET

L	T	P	Credits
3	1	0	4

Total:45 Hours

Learning Outcomes

On successful completion of this course, the students will be able to:

- 1 Understand the outcomes of deficiencies in dietary supplements.
- 2 Apply public health nutrition, maternal and child nutrition, nutrition and ageing, nutrition education in community.
- 3 Study the various optimization techniques for pharmaceutical product development
- 4 Evaluate the regulatory and commercial aspects of dietary supplements including health claims.
- 5 Formulate advanced study of Pharmaceutical Excipients.

Course Content**UNIT I****07 Hours**

- a. Definitions of Functional foods, Nutraceuticals and Dietary supplements. Classification of Nutraceuticals, Health problems and diseases that can be prevented or cured by Nutraceuticals i.e. weight control, diabetes, cancer, heart disease, stress, osteoarthritis, hypertension etc.
- b. Public health nutrition, maternal and child nutrition, nutrition and ageing, nutrition education in community.
- c. Source, Name of marker compounds and their chemical nature, Medicinal uses and health benefits of following used as nutraceuticals/functional foods: Spirulina, Soyabean, Ginseng, Garlic, Broccoli, Ginkgo, Flaxseeds

UNIT II**15 Hours**

- Phytochemicals as nutraceuticals: Occurrence and characteristic features (chemical nature medicinal benefits) of following
- a) Carotenoids- α and β -Carotene, Lycopene, Xanthophylls, leutin
 - b) Sulfides: Diallyl sulfides, Allyl trisulfide.
 - c) Polyphenolics: Resveratrol
 - d) Flavonoids- Rutin, Naringin, Quercetin, Anthocyanidins, catechins, Flavones
 - e) Prebiotics / Probiotics.: Fructo oligosaccharides, Lactobacillum
 - f) Phyto estrogens : Isoflavones, daidzein, Geobustins, lignans
 - g) Tocopherols
 - h) Proteins, vitamins, minerals, cereal, vegetables and beverages as functional foods: oats, wheat bran, rice bran, sea foods, coffee, tea and the like.

UNIT III**07 Hours**

- a) Introduction to free radicals: Free radicals, reactive oxygen species, production of free radicals in cells, damaging reactions of free radicals on lipids, proteins, Carbohydrates, nucleic acids.
- b) Dietary fibres and complex carbohydrates as functional food ingredients.

UNIT IV**10 Hours**

- a) Free radicals in Diabetes mellitus, Inflammation, Ischemic reperfusion injury, Cancer, Atherosclerosis, Free radicals in brain metabolism and pathology, kidney damage, muscle damage. Free radicals involvement in other disorders. Free radical's theory of ageing.
- b) Antioxidants: Endogenous antioxidants – enzymatic and nonenzymatic antioxidant defence, Superoxide dismutase, catalase, and Glutathione peroxidase, Glutathione Vitamin C, Vitamin E, α - Lipoic acid, melatonin
Synthetic antioxidants: Butylated hydroxy Toluene, Butylated hydroxy Anisole.
- c) Functional foods for chronic disease prevention

UNIT V**06 Hours**

- a) Effect of processing, storage and interactions of various environmental factors on the potential of nutraceuticals.
- b) Regulatory Aspects; FSSAI, FDA, FPO, MPO, AGMARK. HACCP and GMPs on Food Safety. Adulteration of foods.
- c) Pharmacopoeial Specifications for dietary supplements and nutraceuticals

Transaction Mode

Lecture, Seminar, e-Team Teaching, e-Tutoring, Dialogue, Peer Group Discussion, Mobile Teaching, Self-Learning, Collaborative Learning and Cooperative Learning
